PROGRAM / EVENT REPORT	
Name of the program	CARCINOMA ENDOMETRIUM
Date and Time	16-12-24 1.30-2.30PM
Venue	Demo Hall, TMCH
Target audience	Faculty and pgs
Number of Participants	12
Program Organized by	DEPARTMENT OF OBG
Resource person	Dr. N. Kalpana, Associate Professor and HOD incharge,
Objective of the Program	The main objectives for managing endometrial cancer are to prevent it in high-risk individuals, screen for early detection, diagnose it accurately, stage it to plan treatment, and provide effective treatment. Objectives also include implementing appropriate screening protocols, differentiating it from other conditions like fibroids, and using interprofessional strategies to improve patient care and outcomes

DETAILED REPORT OF THE PROGRAM
Endometrial carcinoma is the most common gynecologic malignancy, with diagnosis and treatment varying by stage and risk factors. Treatment typically involves surgery, and may also include radiation, chemotherapy, hormone therapy, or targeted/immunotherapy depending on the disease's advancement.
