

PROGRAM / EVENT REPORT	
Name of the program	World Sickle Cell Day June 19, 2025 – Poster Competition
Date and Time	25/06/2025 & 01.30 pm – 3.15pm
Venue	Lecture hall – 3, College block
Target audience	IInd Year MBBS Students
Number of Participants	150
Program Organized by	Department of Pathology
Resource person	Dr. Ravichandran
Objective of the Program	• Enhance knowledge: To deepen understanding of sickle cell anemia's pathophysiology, clinical manifestations, diagnosis, and management among MBBS students. ☐ Promote awareness: To encourage students to creatively communicate key aspects of sickle cell anemia, fostering greater awareness within the student community and potentially beyond. ☐ Stimulate research interest: To inspire students to explore current research, challenges, and advancements in the field of sickle cell anemia. ☐ Encourage advocacy: To motivate future medical professionals to become advocates for sickle cell patients, promoting early detection, genetic counseling, and improved patient care.

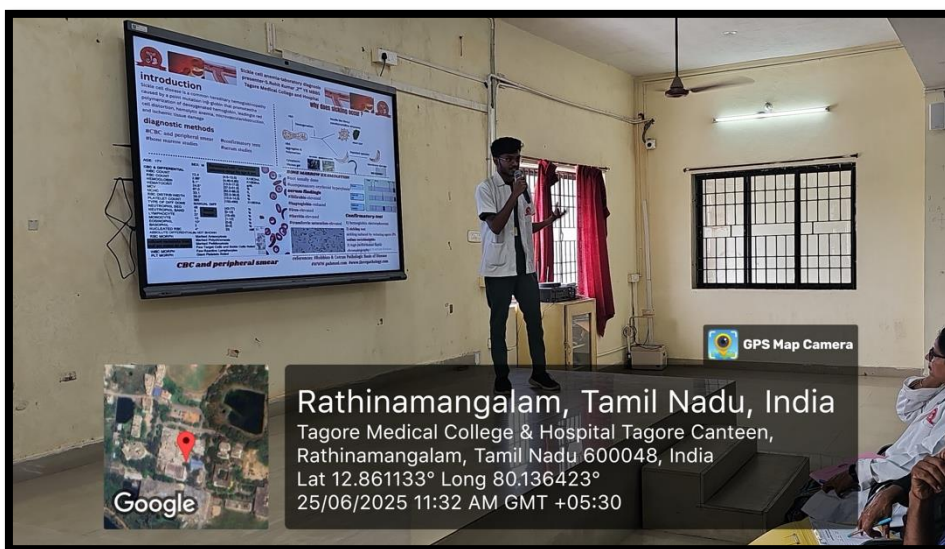

Detailed report of the program

In commemoration of World Sickle Cell Day on June 19, 2025, the Department of Pathology of Tagore Medical College successfully organized a Poster Competition for Second Year MBBS students on the pertinent topic of "Sickle Cell Anemia." The event aimed to significantly enhance students' knowledge, promote widespread awareness, stimulate research interest, and encourage advocacy regarding this genetic disorder.

The competition saw enthusiastic participation from Second Year MBBS students, who presented meticulously researched and visually engaging posters. Topics ranged from the intricate pathophysiology and diverse clinical manifestations of sickle cell disease to advanced diagnostic techniques and comprehensive management strategies. Several posters also highlighted the socio-economic burden and the importance of genetic counselling in affected communities.

The judging panel included esteemed faculty members: Dean Incharge Prof. Dr. Ravichandran from the Department of Paediatrics and Prof. Dr. B. S. Sangeetha from the Department of Pathology. They commended the students for their in-depth understanding and innovative presentation styles. The event successfully achieved its objectives by fostering a deeper academic engagement with sickle cell anaemia, a condition prevalent in many parts of the world. It also served as a powerful platform to educate future medical professionals, equipping them with the knowledge and empathy required to better serve patients with sickle cell disease and advocate for improved public health initiatives. The competition concluded with the announcement of winners, celebrating their efforts in contributing to this vital cause. We thank the management of Tagore Medical College for their support.
