

COLLEGE INFORMATION PROFORMA STATUS

S.No	Information of the medical college/institution Year of Inspection: Government/Private :	2010 Private
1.	Name	Tagore Medical College & Hospital
2.	Address with pin code	Rathinamangalam Melakkottaiyur (post) Chennai – 600127
3.	University address with pin code	The Tamil Nadu Dr. MGR Medical University, No. 69, Anna Salai, Guindy, Chennai - 600032.
4.	Official Website	www.tagoremch.edu.in
5.	Dean	Dr.T.Ravichandran, M.D.,D.ch.,
6.	Mobile Number	9444137508
7.	Email ID of Dean	tagoremch@gmail.com
8.	Hospital	Dr. G.Uthira Kumar, M.S., (General Surgery) Medical Superintendent
9	Date and Year of Registration of the Hospital (DD/MM/YYYY)	2007
10.	Number of Beds	1118 Beds

11.	Number of Beds for emergency	30 Beds
12.	Date of the First Letter of Permission (LOP) of MBBS (DD/MM/YYYY) & number of seats	LOP granted on 14 th May 2010 with an intake of 150 students per annum vide F.NO.U.1201/929/2009-ME (P-2), Dated: 14.05.2010 of the Ministry of Health and Family Welfare, Govt. of India, New Delhi. Intake of seats has been increased from 150 to 250 from the academic year 2025 – 2026 onwards as per LOP issued by NMC in their letter No.N-22011/91/2025-Ass.Cell/MARB (8341260) dated 15.10.2025.
13.	Status of Recognition	Recognised as per Notification number U.12012/224/2015-ME/P2 dated:17.04.2015 for Period of five years . Continuation of recognition granted for the year 2021-2022 by NMC vid Letter No,NMC/UGR/2020/015423, dated:16.07.2021 and renewal of recognition was granted for a period five years from April 2022 by National Medical Commission in their letter No.NMC-34(41)(COR)/T.N/2021-22/048052, dated:20.10.2022.
14.	Number of MBBS and PG broad specialty students admitted in this session*	MBBS : 250 MD/MS : 38 DM/Mch : --- } During the year 2025-2026
15.	Inpatients registered and admitted (01.01.2023 - 31.12.2025)**	2023 : 37689 2024 : 38840 2025 : 63434

16.	Outpatients registered (01.01.2023 - 31.12.2025)**	2023 : 492013 2024 : 498579 2025 : 835544
17.	Number of Deaths reported to the Municipality/Village register	2023 : 53 2024 : 58 2025 : 67
18.	Address and pin code of the Corporation/village where the Death records are reported	Village Administrative Office, Vengadamangalam Panchayat Rathinamangalam, Melakottaiyur post, Chennai - 600 127
19.	Website link/ email ID/ hyperlink of the corporation in case Death Records are reported	www.crstn.org
20.	Number of Births reported	2023 : 2179 2024 : 4131 2025 : 5276
21.	Address and pin code of the Corporation /village where the Birth records are reported	Village Administrative Office, Vengadamangalam Panchayat Rathinamangalam, Melakottaiyur post, Chennai - 600 127
22.	Website link/email ID/hyperlink of the corporation in case Birth Records are reported	www.crstn.org

23.	Number of Rooms in Men's Hostel and students accommodated	Capacity for Boys – 355 For Interns: Boys : 88 Residents: Senior Residents - 64 Junior Residents – 60 PG Boys(AC) – 59
24.	Total Number of Rooms in Women's Hostel and students accommodated	Capacity for Girls - 573 For Interns Girls : 95 PG Girls (AC) – 35
25.	Name of the Grievance Redressal Officer (PIO & CPIO):	Dr. I.Kannan, Dr.K.P.R.Chinthaamani
26.	Address with Pin code	Tagore Medical College and Hospital, Rathinamangalam Melakkottaiyur (post) Chennai - 600127
27.	Telephone Number Email ID	044 30101111/ 044 - 22299555 kannan_iyan@gmail.com chinthaaramalingam@gmail.com
28.	Grievances reported	2023 } 2024 } NIL 2025 }

29. Details of Post – Graduation Courses offered

Post- Graduate Course	Year of Commencement of the Course	Number of Students Currently pursuing the Course	Number of Students admitted in the current session

TAGORE MEDICAL COLLEGE AND HOSPITAL

Department	Faculty Name	Number of Lectures taken per year/topics covered
Anatomy	Dr.D.H.Gopalan M.S., ACME, Ph.D.	1. Introduction to anatomy 2. Introduction to Cardiovascular system 3. Brachial plexus 4. Introduction to embryology 5. Gametogenesis 6. Fertilization 7. Second week of development -1 8. Second week of development -2 9. Third week to eighth week – primitive streak and notochord 10. Fetal membranes 11. Embryological basis of monozygotic and dizygotic twins 12. Fetal circulation 13. Arm(Muscles, Vessels, Cubital fossa ,Anastomosis around elbow joint) 14. Axilla – Boundaries & contents, Axillary artery & vein 15. Radial nerve

		16. Gametogenesis and Fertilization 17. Gametogenesis and Fertilization 18. 1 st week of development 19. Front of thigh (Muscles, Adductor canal & Iliotibial tract) 20. Femoral triangle and its contents 21. Hip Joint 22. Knee Joint 23. Gait & Joints of foot (Ankle & Sub-talar joint) 24. Mammary gland 25. Diaphragm & Azygos vein 26. Blood supply of the heart 27. Anterior abdominal wall 28. Inguinal canal 29. Posterior abdominal wall- Abdominal Aorta /IVC 30. Internal iliac artery 31. GIT histology general features 32. Development of gut 33. Development of genito-urinary system 34. Extrahepatic biliary apparatus 35. Liver 36. Portal vein 37. Cross sectional anatomy at the level of T8, T10 and L1 38. Testis and spermatic cord 39. Male urethra 40. Ischiorectal fossa 41. Pelvic diaphragm and Perineal body 42. Submandibular gland and ganglion 43. Pharynx 44. Middle ear – boundaries & subdivisions Mastoid antrum & contents of Middle ear 45. Tongue 46. Paranasal air sinuses 47. Blood supply of brain 48. Brain stem
--	--	--

Anatomy	Dr. M.Vani M.Sc., Ph.D.	1. Introduction to anatomy and anatomical terminologies 2. Introduction to Lymphatic system 3. Introduction of bones, cartilages and joints 4. Front of forearm 5. Histology : Blood vessels 6. Pectoral region 7. Shoulder joint 8. Elbow joint, radioulnar joint 9. Wrist joint ,First carpometacarpal joint 10. Nerves of upper limb- Median and Ulnar nerve 11. Histology of Bone & Cartilage 12. Adductor compartment of thigh 13. Posterior compartment of leg with retinaculum 14. Arches of foot 15. Intercostal space 16. Pericardium 17. Chambers of heart 18. Stomach 19. Pancreas 20. Small and large intestine 21. Vermiform appendix 22. Anal canal 23. Kidney& suprarenal gland 24. Urinary bladder 25. Face-Muscles and extra cranial courses of facial nerve with Bell's palsy 26. Facial artery, facial vein and sensory innervation of face 27. Anterior triangle of neck 28. TM joint 29. Thyroid gland 30. Lateral wall of nose 31. Vertebral canal and its contents 32. Cranial cavity
---------	-------------------------	---

		33. Meninges and Dural folds 34. Dural venous sinuses 35. Cerebellum 36. White matter of cerebrum 37. Lateral Wall Nose 38. CSF circulation & lateral ventricle 39. 7 th cranial nerve 40. Dissection – Corresponding topic
Anatomy	Dr.P.Preethi M.D.	1. Introduction to Muscular system 2. AETCOM 3. Histology – Skin & Glands 4. Histology : Epithelium 5. Deltoid, Rotator cuff muscles & Axillary nerve 6. Back of forearm 7. Lymphoid organs 8. Hand (muscles and vessels) 9. Hand spaces, dorsal digital expansion ,fibrous flexor sheaths 10. Deep fascia of thigh & inguinal group of lymph node(Saphenous opening) 11. Gluteal region 12. Sole 13. Venous drainage of lower limb 14. Radiology of lower limb 15. Trachea, phrenic nerve and thoracic sympathetic chain 16. Mediastinum 17. External features of heart 18. Fibrous skeleton of heart & cardiac plexus 19. Diaphragm & Azygos vein 20. Radiology of thorax 21. Peritoneum 22. Duodenum 23. Rectum

		24. Uterus 25. Perineum 26. Radiology of abdomen 27. SCALP – Layers, BS, NS & Surgical importance, Roles of emissary veins 28. Eyelid, Lacrimal apparatus, EJV 29. Deep cervical fascia 30. Infratemporal fossa –Boundaries & Muscles of mastication 31. Mandibular nerve, otic ganglion, chorda tympani nerve 32. Maxillary artery 33. Orbit –boundaries & contents, Superior orbital fissure 34. Extra ocular muscles of eye ball 35. Ciliary ganglion, Ophthalmic artery & veins and Eyeball 36. Development of eye 37. Larynx 38. Blood supply of head and neck (subclavian artery, IJV and brachiocephalic vein) 39. Cerebral hemisphere 40. Vertebral canal & its contents
Anatomy	Dr.S. Rajalakshmi M.D.	1. Bones of Skull with norma frontalis and verticalis 2. Sub-occipital triangle, splenius and semispinalis capitis 3. Cervical plexus and cervical sympathetic ganglion, Pterygopalatine fossa and ganglion 4. Lymphatic drainage of head and neck 5. 5th cranial nerve 6. Development of pharyngeal arches 7. Development of face, palate, nose, thyroid, tongue 8. Somites and neural tube development 9. Placenta 10. Antenatal screening

	Dr. C. Swathi Priyadharshini M.Sc., Ph.D.	1. Histology: Connective tissue 2. Scapular region(Scapular muscles& Intermuscular spaces 3. Muscle and ganglion 4. Vessels of upper limb 5. Venous and lymphatic drainage of upper limb 6. Deep fascia of thigh & inguinal group of lymph nodes(Saphenous opening) 7. Posterior compartment of thigh Popliteal fossa 8. Deep fascia of leg, Anterior & lateral compartment of leg with dorsum of foot with corresponding retinacula 9. Pleura 10. Lungs 11. Thoracic duct , Arch of aorta 12. Celiac trunk and spleen 13. Mesenteric vessels 14. Histology of GIT 15. Lumbosacral plexus 16. Bony pelvis 17. Vas deferens, seminal vesicle, ovary and fallopian tube 18. Posterior triangle of neck 19. Nasal septum 20. Internal ear 21. Pituitary gland 22. Introduction to Neuroanatomy & Spinal cord 23. Spinal cord 24. Soft palate and Tonsil 25. White matter of brain
	Dr. R. Sumithra M.Sc., B.S.M.S	1. 3rd, 4th, 6th cranial nerve 2. 9th & 12th cranial nerve 3. Thalamus, Basal ganglia & limbic system 4. Third & fourth ventricle 5. Pituitary gland

		6. Histology of olfactory epithelium, optic nerve ,sclero - corneal junction and organ of Corti 7. Histology of lip ,pineal gland ,and eyelid 8. Location of hyoid bone, thyroid and cricoid cartilages with vertebral levels
Anatomy	Dr. K. Hemalatha M.B.B.S	1. Bones of lower limb – Hip bone & Femur 2. Demonstration of lumbar vertebra 3. Norma basalis
	Dr. S. Ashwin M.B.B.S	1. Bones of thoracic cage – Sternum, Ribs & Thoracic vertebra 2. Norma lateralis and occipitalis 3. Demonstration of sacrum and coccyx
	Dr. M. Thenmozhi M.B.B.S	1. Bones of Skull with norma frontalis and verticalis 2. Mandible and cervical vertebra 3. Bones of lower limb – Tibia & Fibula
Biochemistry	Dr. Roopa MD	Diabetes mellitus Regulation of Blood Glucose
	Dr.Mario Leesha Fernando MD.,MBA	Plasma membrane Cellular transport Homo & Heteropolysaccharides Phospholipids & Sphingolipids Hemoglobin derivatives & Variants(online) Heme synthesis (online) Disorders of Heme synthesis (online) Disorders of Heme catabolism Glycolysis Gluconeogenesis Regulation of Gluconeogenesis & PDH complex Glycogenesis and regulation

		Glycogenolysis and its storage disorders Regulation of Blood Glucose Diabetes mellitus Metabolism of aromatic aminoacids, Phenylalanine & Tyrosine Tryptophan metabolism Beta oxidation & its regulation Beta oxidation & its disorders DNA replication & repair Heme catabolism TCA cycle & its regulation HMP pathway Uronic acid pathway Iron metabolism & its disorders Catabolism of Protein & disposal of ammonia Urea cycle and its disorder Special products of amino acids Other types of Oxidation Ketogenesis & its utilization Cholesterol synthesis & its regulation Bile acid metabolism and its regulation Lipoprotein types, structure & functions Exogenous pathway Endogenous pathway Lipid storage disorders Atherosclerosis, Lipid profile & its interpretation Fluid balance I Electrolyte balance
--	--	--

Biochemistry		Fluid balance II Vitamin D Acid base balance Disorders of Acid base balance Disorders of Purine & Pyrimidine metabolism RNA Transcription Post transcriptional modifications Thyroid function test Disorders of thyroid function test Interpretation of thyroid function clinical charts Renal function tests and its disorders Liver function test and its disorders Clinical charts on Liver function tests
	Dr.K.Kasthuri M.Sc.,Ph.D.	Molecular organization of cell & cell organelles Principles of calorimetry Sulphur containing amino acids Wavelength fixation & measuring O.D Digestion and absorption of carbohydrates Normal constituents of urine OSPE Digestion & Absorption of lipids Metabolism in fasting & fed state Structural Organization of Proteins Xenobiotics Role of oxidative stress & anti oxidants Protein targeting & sorting (SDL)

Biochemistry		Calcium Vitamin E & K (SDL) Niacin & Riboflavin Pyrimidine metabolism Protein Translation Cell cycle and cyclins Genetic code Post translational modifications Gene mutations & associated disorders Molecular techniques-I - Recombinant DNA, Blotting, Cloning Molecular techniques-II – PCR, Gene therapy Molecular techniques-III - Gene therapy , Genomic library Regulation of Gene expression Cancer biology Assessment Record writing
	Dr. Harini MD	Disorders of thyroid function test
	Ms.Vasanthi M.Sc.,	Structure & Functions of Immunoglobulins Fructose and Galactose metabolism (SDL) Glycine metabolism Branched chain amino acids Biological oxidation Electron transport chain Nucleotide chemistry Disorders of Purine & Pyrimidine metabolism
Physiology	Dr. Preetha Paul	1. Introduction to Physiology 2. Homeostasis- internal environment, feedback mechanisms 3. Haemostasis

4. Bleeding disorders & fibrinolytic system
5. Blood grouping, Haemolytic disease of newborn
6. Immunity
7. Neuromuscular Junction-Structure, events, drugs acting, myasthenia gravis
8. Molecular basis of skeletal muscle contraction, EC coupling
9. Cardiac cycle
10. ECG - Normal ECG, changes during ischemia, MI, heart block
11. Blood Pressure - Determinants, regulation, hypertension I
12. Coronary circulation

13. Capillaries, local and humoral control, microcirculation
14. Starling's forces adema
15. Transport of O₂ in blood
16. Chemical regulation of respiration, periodic breathing
17. Pathophysiology of Hypoxia, dyspnoea, cyanosis, asphyxia, drowning.
18. Cardiovascular and respiratory changes during mild moderate and severe exercise.
19. Introduction to GIT, Functional Organization, characteristics of GI wall, innervation.
20. Pancreatic secretions, mechanism of secretion, regulation, functions, pancreatic function tests & applied
21. GI motility & Applied
22. GFR - factors affecting & regulation
23. Mechanism of formation of concentrated & dilute urine, Regulation of osmolarity
24. Principles of fluid therapy
25. Synapse
26. neurotransmitters, chemical transmission in nervous system
27. somatic sensations & sensory tracts - Dorsal column

Physiology		28. Voluntary movements:- General principles, Corticospinal tracts and effects of lesion 29. Corticobulbar tracts, other desc pathways, UMN & LMN lesions 30. Spinal cord injury, transections, hemisection, Brain death 31. Basal ganglia 32. Learning, Memory 33. Cortical Association & Prefrontal Areas Cerebral dominance 34. Language , Speech, Applied aspects 35. Adrenal cortex, Morphology, hormone synthesis, Mineralocorticoid functions and applied 36. Insulin, glucose homeostasis and diabetes mellitus 37. Metabolic and endocrine consequences of Metabolic syndrome & Obesity , stress response, psychiatry component related to metabolic syndrome 38. Female reproductive physiology-The menstrual cycle 39. Contraception in male and female. 40. Cause for infertility, role of IVF 41. Hormonal changes and their effects in perimenopause and menopause 42. Photochemistry of vision, light & dark adaptation 43. Organ of corti, sensory transduction in cochlea, endo cochlear potential , mechanism of hearing. 44. Auditory pathway ; Deafness, tests of hearing, 45. Visual pathway & lesions, Light reflexes 46. Microscope Teaching session 47. Hemocytometer Teaching session 48. WBC Count Teaching session 49. RBC Count Teaching session 50. Recording of Blood pressure – teaching session
		51. General examination 52. Higher functions

Physiology		53. Clinical examination of Respiratory System 54. Record and interpret ECG - Teaching session
	Dr. S. Manikandan Professor	1. Body fluid compartments, measurements 2. Concept of pH and buffer system 3. Anaemia—classification, principles in treatment, reticulocyte count, blood indices. Polycythemia-defn,types,effects 4. Platelet 5. RMP,Nerst equilibrium 6. Action potentials 7. Properties of Skeletal muscle, mode of muscle contraction, Energy source and muscle metabolism 8. Autonomic Nervous System 9. Introduction to cardiovascular system - Functional anatomy of heart, blood supply, innervations of heart, cardiac muscle action potential, properties of cardiac muscles 10. Cardiac output I - Determinants, regulation, measurements. 11. Local and systemic cardiovascular regulatory mechanisms 12. Hemodynamics 13. Shock & Cardiac Failure 14. Mechanics of Breathing; Intra pleural & intra pulmonary pressures & changes with respiration, compliance, gas exchange 15. Pulmonary circulation, special features, functions & regulation, V/Q ratio , regional differences 16. Functional anatomy of stomach, Gastric secretion, phases,regulation,and experimental evidences 17. Gastric motility applied (peptic ulcer, gastric function test) 18. Digestion & Absorption of fats 19. Digestion & Absorption of carbs and proteins 20. Tubular Reabsorption and Secretion, implication of Renal clearance

		21. Renal function tests 22. Organization Of Nervous System 23. Cerebral cortex 24. Anterolateral pathway, Physiology of pain, pathway & its modulation (analegesic system) 25. Referred pain and other applied 26. Posture regulating systems, postural reflexes & intergration at various levels, 27. Decerebrate and decorticate rigidity. 28. Hypothalamus 29. Sleep & EEG 30. Hormones of Anterior pituitary, GH 31. Pineal gland & Thymus and local hormones 32. Physiology of bone , Calcium metabolism & Homeostasis 33. Sex determination & Development of male and female genitalia, Abnormalities of sex determination 34. Male reproductive system 35.
Physiology		36. Hormones in Pregnancy, lactation 37. Effect of removal of gonads on physiological functions. 38. Optics of eye, Visual acuity, Accommodation & errors of refraction 39. Color vision , applied 40. Visual pathway & lesions, Light reflexes 41. Auditory pathway ; Deafness, tests of hearing, 42. Chemical senses, smell and taste pathways, applied 43. Lab Protocol, microscope teaching session 44. Hb Estimation Teaching session 45. Clinical examination of CVS - Teaching Session 46. Clinical examination of Cranial nerves VII - XII teaching session 47. Clinical Examination of Sensory system Teaching session 48. Mosso's Ergography Teaching session

	Dr. S. Subamalani Associate professor	1. Cell and its organelles , apoptosis, intercellular connections 2. Composition of blood, plasma proteins, PCV, ESR and applied 3. RBC – structure, function & variation, applied 4. Erythropoiesis -1 5. Haemoglobin synthesis,structure,types, fate of RBC, abnormal Hb, jaundice 6. WBC, Macrophages(monocyte macrophage system) 7. Structure of skeletal muscle 8. Gradation of muscular activity, Myopathies 9. Nerve injury- degeneration and regeneration in peripheral nerve, SD curve 10. Origin & spread of cardiac impulse Pacemaker potential 11. Heart rate , its regulation & Determinant 12. Intro to RS: Functional anatomy of respiratory passage & lungs, structure of alveolus, alveolar capillary membrane, Diffusion & factors affecting diffusion 13. PFT, Spirometry, Lung volumes & capacities - definition, normal values, significance, factors affecting VC, variations , FEV & variations 14. Transport of CO₂ in blood 15. Neural regulation of respiration 16. Physiological adaptation in special environments, high altitude, deep sea diving and gravity 17. Salivary secretion, regulation , functions & applied 18. Physiological activities in Mouth, pharynx & esophagus (mastication , deglutition , vomiting)applied 19. Small intestine functional anatomy, secretions, regulation, motility applied 20. GI Hormones, Gut Brain Axis. 21. Introduction to renal physiology; Renal blood flow, JGA, nonexcretory functions of kidney 22. Renal transplantation, Renal failure, Dialysis 23. Functional Anatomy & Organization of Nervous System,
--	--	--

		Classification of neurons,neuroglia, classification of nerve fibre TS of Spinal Cord
Physiology	Dr. S. Subamalani Associate professor	24. Sensory receptors, Principles of sensory Physiology 25. Cerebellum 26. Limbic System 27. Reticular formation, ARAS 28. CSF, Circum ventricular organs & Blood Brain Barrier 29. Hormones of Posterior Pituitary & Applied, Neuroendocrine Reflex 30. Thyroid hormone synthesis, functions and applied 31. Hormones of adrenal medulla 32. Pregnancy changes, tests for pregnancy, fetoplacental unit, parturation, lactation. 33. Functional anatomy of eye , aqueous humor, layers of retina, refractive surfaces, image formation 34. Physiology of aging, free radicals and antioxidants 35. Bleeding Time & clotting time teaching session 36. Reticulocyte count – teaching and demo session 37. Arterial Pulse & Venous Pulse - Clinical teaching session 38. Effect of Exercise on Blood Pressure- teaching session 39. Effect of Posture on Blood Pressure- teaching session 40. Clinical examination of Cranial nerves I-VI teaching session 41. Clinical Examination of Motor system Teaching session 42. Superficial and deep Reflex - teaching session
	Dr. B Vasanthi Assistant professor	1. Transport across cell membrane 2. Blood transfusion and blood banking 3. Nerve physiology- structur, functions, properties 4. Neuroglia, neurotrophins 5. Smooth muscle contraction, structure, types, mechanism of contraction, properties 6. Comparision of skeletal, cardiac and smooth muscle 7. Regional circulation - Cutaneous, splanchnic 8. Regional circulation - Skeletal, Cerebral

		9. Lymphatics 10. Gaseous exchange and alveolar ventilation- Surfactant, work of breathing, dead space, composition of inspired air expired air 11. Liver , gall bladder, functional anatomy, secretions ,regulations functions , applied (jaundice) 12. Large intestine(movements functions) & defaecation reflex 13. Artificial respiration , oxygen therapy 14. Renal regulation of fluid and electrolytes , Role of kidney in acid base balance 15. Micturition, cystometogram, & bladder dysfunctions 16. Stretch receptor & Physiological basis of muscle tone, alpha-gamma linkage, 17. Vestibular apparatus 18. Brain stem pathways & mechanisms involved in posture & equilibrium, 19. Thalamus 20. Temperature Regulation, adaptation to altered temperature, Skin 21. Introduction to endocrinology, Mech of Hormone Action, Hypothalamo pituitary axis
Physiology		22. Glucocorticoids 23. Puberty – onset, progression, stages, early and delayed puberty, Menopause, 24. Physiological effect of Sex Hormones 25. Fetal circulation 26. Hearing, Functional anatomy of ear, & impedance matching attenuation reflex 27. Consequences of sedentary life style, physiological effect of meditation. 28. Differential count Teaching session 29. Platelet count demo Teaching Session 30. Clinical examination of Abdomen Teaching 31. Harverd step test Teaching session

		32. Spirometry and PEFr Teaching session
	Dr. A. David Arockiya	1. PCV Demonstration 2. Osmotic fragility- Demonstration 3. ESR – Demonstration 4. General Examination – Demonstration 5. Recording the Blood pressure – Demonstartion
	Dr. Anbumani,	1. PCV & ESR – Demonstration 2. Osmotic fragility- Demonstration 3. ESR – Demonstration 4. General Examination – Demonstration
	Dr. N. Santhanalakshmi,	1. PCV– Demonstration 2. Osmotic fragility- Demonstration 3. General Examination – Demonstration 4. Recording the Blood pressure – Demonstartion
Pharmacology	Dr. R.Geetha Professor Topics: 48	1. Routes of drug administration 2. Pharmacokinetics- Absorption 3. Pharmacodynamics -Mechanism of drug action 4. ANS – General considerations 5. Histamines and antihistamines 6. Serotonin 7. Prostaglandins 8. Non steroidal anti- inflammatory drugs 9. Drugs for cough 10. Drugs for Migraine

		11. Anti cholinergic 12. Alpha blockers 13. Drugs of diabetes – Insulin 14. Estrogens and anti- estrogens 15. Progestins and anti progestins 16. Hormonal contraceptives 17. General Principles in Chemotherapy 18. Quinolones 19. Renin angiotensin aldosterone System 20. Anti anginal drugs 21. Calcium channel blockers 22. Anti hypertensive drugs 23. Drugs for shock 24. Antimalarial drugs 25. Coagulants and anticoagulants 26. Anti-platelet drugs 27. Broad spectrum antibiotics 28. Skeletal muscle relaxants 29. Drugs for Gout 30. Antipsychotic drugs 31. Drug development and clinical trial 32. Ethyl-Alcohols
--	--	--

		33. Sedative – hypnotics 34. Anti parkinsonian drugs 35. Drug for peptic ulcer and GERD 36. Aminoglycosides 37. Anti fungal 38. Anti cancer drugs 39. Drugs used in cardio pulmonary resuscitation 40. Plasma expanders 41. Bradykinins 42. Nitric oxide and endothelins 43. Drugs affecting biliary system 44. Toxicology- heavy metals and their antagonist 45. Drugs of abuse in sports 46. Geriatric pharmacology 47. Drug therapy of dental disorders 48. Chronic drug use and drug holidays
Pharmacology	Dr. A.Umameswari Professor Topics: 48	1. Principles of Pharmacology Definitions 2. Pharmacokinetics- Distribution 3. PK -Biotransformation 4. PK -Excretion 5. PK -Biotransformation 6. PD – Receptor pharmacology Factors for prolongation of drug action 7. Adverse drug reaction and pharmacovigilance 8. Drugs for Rheumatoid arthritis 9. Drugs for bronchial asthma 10. Cholinergic drugs 11. Adrenergic drugs 12. Beta-blockers

		13. Pencillins 14. Cephalosporins 15. Immunosuppressant 16. Diuretic drugs 17. Anti diuretic drugs 18. Anti depressant drugs 19. Cardiac glycosides and Drugs for Cardiac Failure 20. Anti arrhythmic drugs 21. Hypolipidemic drugs 22. Fibrinolytics and antifibrinolytics 23. Macrolides 24. Miscellaneous antibiotics(lincosamide, glycopeptides and others) 25. Local anaesthesia 26. Antianxiety drugs 27. Antimanic drugs 28. Anti-epileptic drugs 29. Anterior pituitary hormones 30. Thyroid hormone and thyroid inhibitors 31. Oral hypoglycaemic drugs 32. Oxytocin and other drugs Acting on uterus 33. CNS stimulants and cognition enhancers 34. Drug therapy of neuro degenerative disorders 35. Substance abuse and dependants 36. General anaesthesia
--	--	---

		37. Opioids analgesics 38. Anti emetic drugs 39. Prokinetic and digestion drugs 40. Sulphonamides and co- trimoxizole 41. Anti amoebic and other anti protozoal drugs 42. Therapeutic gases 43. Drugs for chronic inflammatory bowel disease 44. Toxicology – management of acute poisoning 45. Ocular pharmacology 46. Pharmacoepidemiology 47. Concepts of essential medicine and national list of essential medicines 48. Pharmacoeconomics
Pharmacology	Dr. Dharam Prasath.D Assistant Professor Topics: 16	1. Androgen and related drugs 2. Drugs for erectile dysfunction 3. Corticosteroids 4. Drugs acting on skin and mucous membrane 5. Vitamins 6. Drugs for constipation & diarrhoea 7. Basic aspects of immunology 8. Vaccines, antisera 9. Drug for myocardial infarction

		10. Anti viral drugs 11. Anti retroviral drugs 12. Anti tubercular drugs 13. Urinary antiseptics 14. Pharmacotherapy of paediatrics 15. Treatment of drug resistant tuberculosis 16. Pandemic module
Pharmacology	Dr. R.Niroop Assistant Professor Topics: 5	1. Drug interactions 2. Immunostimulants 3. Chronopharmacology 4. Monoclonal antibodies 5. Targeted therapy
	Dr.S. Kirti Assistant Professor Topics: 4	1. Antihelminthic drugs 2. Gene therapy 3. Cytotoxic Agents And Antimetabolites 4. Drugs for UTI and syphilis.
	Dr..Deepthi Krishna Tutor Topics: 11	1. Drugs affecting calcium balance 2. Treatment of Irritable bowel syndrome 3. Anti leprosy drugs 4. Chelating agents

		5. Environmental and occupational toxicity 6. Drugs used for pregnancy & lactation 7. Drugs for enzyme therapy 8. Antiseptics, disinfectants and ectoparasitocides 9. Ganglion Blocker 10. Pharmacogenetics & Pharmacogenomics 11. Therapeutic Drug Monitoring
	Dr.M. Saranya Tutor Topics: 2	1. Rational drug use 2. Drugs for glaucoma
	Dr.S. Jagadeesh Tutor Topics: 2	1. Heamatinics and erythropoietin 2. Fixed Dose Combination
Pathology	Dr C P Luck	1. Introduction to CBME. 2. Cardiomyopathies 3. Pericarditis. 4. Introduction to Hemolytic anemia 5. Hereditary Spherocytosis. 6. Sick cell anemia 7. Thalassemia. 8. Multiple Myeloma. 9. Hodgkin's Lymphoma. 10. COPD – I 11. Pneumoconiosis 12. SCC 13. Malignant Melanin. 14. Melanomas. 15. Oesophagus – Benign

		9)Examination of the thyroid gland 10)Examination of the breast
General Surgery	Dr. Joseph Wilfred Amrit, MS Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Introduction to urology and urological investigations 2. Benign Diseases of Kidneys & Ureters including calculi 3. Malignant Neoplasms of Kidneys 4. Disorders of Urinary Bladder 5. Disorders of Prostate 6. Disorders of Urethra & Penis 7. Benign Scrotal Conditions 8. Carcinoma Testis 9. Pediatric Urological Diseases 10. Renal Transplantation <u>Practical Topics</u> 1)General Scheme of clinical case taking 2)History taking for urology case 3)Approach to urology case 1 4) Approach to urology case 2 5) Examination of male external genitalia 6)Examination of pelvic mass 7)Examination of renal swellings 8)Approach to pediatric urology cases

		9)Examination of the hernia 10)Examination of inguinoscrotal swellings(other than hernia)
	Dr.S.Devi Priya M.S Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Surgical Anatomy of thyroid,Investigations in 2. Thyroid disorders 3. Approach to hypothyroidism & MNG 4. Approach to Hyperthyroidism & Thyrotoxicosis 5. Thyroid Malignancies-Introduction,Clinical features,Classifications,Investigations 6. Papillary & Follicular Carcinoma Thyroid 7. Medullary,Anaplastic and Other thyroid malignancies 8. Introduction to Adrenal Disorders & Benign Adrenal Disorders-Conn's,Cushings,Adrenal Insufficiency 9. Pheochromocytoma & Adrenal Malignancies 10. Pancreatic Neuroendocrine Tumours,MEN <u>Practical Topics</u> 1)General Scheme of clinical case taking 2)Examination of lump or swelling 3)Examination of an ulcer,sinus & fistula 4)Examination of Peripheral Vascular Disease 5)Examination of Varicose veins 6)Examination of lymphatic system 7)Examination of palate,cheek,tongue and floor of mouth

		8)Examination of salivary glands 9)Examination of the thyroid gland 10)Examination of the breast
General Surgery	Dr.S.Preethiya M.S Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Burns 2. Benign Surgical Skin diseases,B.C.C 3. S.C.C,Malignant Melanoma 4. Head Injuries 5. Cleft Lip & Cleft Palate 6. Benign & Premalignant Lesions of Oral Cavity 7. Oropharyngeal Carcinoma-Introduction,premalignant lesions,staging,investigations 8. Management of oropharyngeal carcinoma,complications & adjuvant therapy. 9. Surgical Anatomy & Benign Diseases of Salivary glands 10. Malignant Diseases of Salivary glands <u>Practical Topics</u> 1)General Scheme of clinical case taking 2)Examination of lump or swelling 3)Examination of an ulcer,sinus & fistula 4)Examination of Peripheral Vascular Disease 5)Examination of Varicose veins

General Surgery		6)Examination of lymphatic system 7)Examination of palate,cheek,tongue and floor of mouth 8)Examination of salivary glands 9)Examination of the thyroid gland 10)Examination of the breast
	Dr.Alakhananda Chandranath Total classes:8 hours /year 4 theory classes 4 practical classes	<u>Theory Topics</u> 1. Disaster Surgery 2. Introduction to Trauma & ATLS Protocol 3. Maxillofacial Trauma 4. Chest Trauma <u>Practical Topics</u> 1)Examination of Varicose veins 2)Examination of salivary glands 3)Examination of the thyroid gland 4)Examination of the breast
	Dr.T.Kabilan alias Vetrivel Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Pathophysiology,Types & Management of Shock 2. Blood Transfusions & Blood Substitutes 3. Wound Healing,Scars and Tissue Repairs 4. Surgical Infections 5. Surgery in Tropics-Amoebiasis,Ascariasis,Filariasis 6. Hydatid Disease 7. Leprosy,Tuberculosis & Mycetoma 8. Imaging Modalities in surgery

		9. Tissue Diagnosis 10. Pre-operative preparation of the surgical patient <u>Practical Topics</u> 1)General Scheme of clinical case taking 2)Examination of lump or swelling 3)Examination of an ulcer,sinus & fistula 4)Examination of Peripheral Vascular Disease 5)Examination of Varicose veins 6)Examination of lymphatic system 7)Examination of palate,cheek,tongue and floor of mouth 8)Examination of salivary glands 9)Examination of the thyroid gland 10)Examination of the breast
	Dr.S.Ilakkiya Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Pathophysiology,Types & Management of Shock 2. Blood Transfusions & Blood Substitutes 3. Wound Healing,Scars and Tissue Repairs 4. Surgical Infections 5. Surgery in Tropics-Amoebiasis,Ascariasis,Filariasis 6. Hydatid Disease 7. Leprosy,Tuberculosis & Mycetoma 8. Imaging Modalities in surgery 9. Tissue Diagnosis 10. Pre-operative preparation of the surgical patient <u>.Practical Topics</u> 1)General Scheme of clinical case taking 2)Examination of lump or swelling 3)Examination of an ulcer,sinus & fistula 4)Examination of Peripheral Vascular Disease

		5)Examination of Varicose veins 6)Examination of lymphatic system 7)Examination of palate,cheek,tongue and floor of mouth 8)Examination of salivary glands 9)Examination of the thyroid gland 10)Examination of the breast
General Surgery	Dr.V.Prem Kumar Total classes:20 hours /year 10 theory classes 10 practical classes	<u>Theory Topics</u> 1. Pathophysiology,Types & Management of Shock 2. Blood Transfusions & Blood Substitutes 3. Wound Healing,Scars and Tissue Repairs 4. Surgical Infections 5. Surgery in Tropics-Amoebiasis,Ascariasis,Filariasis 6. Hydatid Disease 7. Leprosy,Tuberculosis & Mycetoma 8. Imaging Modalities in surgery 9. Tissue Diagnosis 10. Pre-operative preparation of the surgical patient <u>Practical Topics</u> 1)General Scheme of clinical case taking 2)Examination of lump or swelling 3)Examination of an ulcer,sinus & fistula 4)Examination of Peripheral Vascular Disease 5)Examination of Varicose veins 6)Examination of lymphatic system 7)Examination of palate,cheek,tongue and floor of mouth 8)Examination of salivary glands 9)Examination of the thyroid gland 10)Examination of the breast
	Dr.J.Manikandan	<u>Theory Topics</u>

	Total classes:20 hours /year 10 theory classes 10 practical classes	1. Pathophysiology,Types & Management of Shock 2. Blood Transfusions & Blood Substitutes 3.
