

DEPARTMENT OF ANATOMY

EVENT: Guest lecture

TOPIC: The Making Of The Gut: Embryological Insights For Clinical Practice

DATE: 04.06.2025

Guest Speakers:

The Department of Anatomy, Tagore Medical College and Hospital organized a guest lecture on “**The Making of the Gut: Embryological Insights for Clinical Practice**”. The session aimed to enhance students' understanding of the embryological development of the gastrointestinal system, covering key topics such as the formation and regionalization of the primitive gut tube, development of the foregut, midgut, and hindgut, and the embryological basis of congenital anomalies like Meckel's diverticulum and malrotation. Dr. **Dr. Padma Kannan MBBS., MS., FIAGES Clinical Assistant (Gen.Surgery), GI And Hepatobiliary Unit, PD Hinduja Hospital Mumbai** delivered an engaging and informative presentation using detailed diagrams and clinical correlations, which helped students connect theoretical knowledge with practical medical implications. The lecture was well-attended by students and faculty, who actively participated in the interactive Q&A session. Overall, the event was highly informative and appreciated, contributing significantly to the academic enrichment of all participants. We would like to thank our chairperson, secretary and dean for making this event a success.
