Opportunities for Midcourse Improvement

1. Timely administration of Continuous Internal Assessment Examination

The Internal assessment for all phases of MBBS course is prepared before the commencement of the academic year and incorporated into the academic calendar. The academic calendar is published on the institution website for information to the students. This gives ample preparation time to equip the students for the Internal exams.

2. On time assessment and feedback

Answer keys are prepared for the question papers of internal assessment and the answer sheets are evaluated by all the faculty of the department in accordance with the marks allotment to avoid bias. The evaluated answer sheets are distributed to the mentors within a week of conduct of internal assessment and one to one constructive feedback is provided to the students.

3. Remedial classes

The remedial classes are conducted daily after class hours (3.30 PM to 4.30 PM) by the respective departments.

4. Makeup assignments and re-tests

Makeup assignments are given and re-test is conducted for the students who score below average in the internal assessment by the respective departments and the answers sheets are evaluated in front of the students and the answers are discussed with the them during the remedial class hours.
