(Affiliated to the Tamil Nadu Dr.MGR Medical University & Recognized by the Ministry of Health & Family welfare. Govt. of India New Delhi)

Detailed Report of The Programme

Under the leadership of OBG HOD, PG's and 25 CRRI's of the Department of Obstetrics and Gynaecology conducted a gender awareness program on 22/10/2021. Our speaker Dr. P.B. Premalatha instilled the importance of gender awareness and how to protect themselves against gender harassment into the minds of college students. Students were also given lecture on physiology, anatomy on female reproductive tract. Students were counselled on how to get through the fine feelings of this tender age. They were sensitized on the potential problems anticipated and how to ask for help and come out of problems if any when faced in the college life and further.

Detailed Report of the Programme

CRRIs and the staff of UHTC, Chrompet, conducted a health education regarding breast feeding at chithalapakkam- Anganwadi centre. 12 Antenatal and 14 post-natal mothers along with their babies and 14 elderly persons attended the programme. Benefits, significance & do's and dont's of breast feeding were explained to them. Mothers actively participated in the programme and clarified their queries. The session was very interactive.

FEED BACK:

- People understood the importance of exclusive breast feeding, positioning techniques, advantages of breastfeeding to the mother and baby and also the do's and don'ts during breastfeeding period.
- Doubts regarding complementary feeds and to continue breast feeding until 2 years was explained
- Moreover question and answer session conducted and gifts were given to every one for their active participation and memento given to elderly persons.
- A postnatal mother asked about the difficulty in feeding her 2 year old child with cow's milk. She was advised to feed her baby with essential nutrients such as fruits, vegetables, cereals and also to consult a paediatrician as soon as possible.

Detailed Report of the Programme

TMCH conducted health education on the topic PREVENTION OF ANAEMIA, in Gangai Amman kovil street, we provided health education regarding prevalence types, causes symptoms, investigations prevention and treatment of anemia.

Insisted about the primordial prevention of anemia by educating about the iron rich food items, further primary prevention like Prophylactic iron supplementation in pregnancy, post-mortem and adolescence girls, then about treatment options available for treatment of various types of anemia.

This is followed by a health camp, around 35 patients attended the camp most of them are falling in age group 40-70. Among the patients 29 year old female came with c/o palpitation, breathlessness with h/o Hb- 8.2grms/dl (before 7 months).

Prescribed the patient with iron tables and referred the patient to our centre for checking the current Hb level. 22 Community cancer screening questionnaire had been collected from by the patients.

ENVIRONMENTAL CLEANLINESS

- The participants were educated about the common forms of environmental pollution viz., air, water & noise pollution.
- The ill effects of Chemical exposure & Overcrowding were explained.
- Occupational hazards and ways to prevent and protect against industrial accidents was taught to the workers.
- The importance of drinking boiled water, food safety was stressed upon them.
- They were urged to dispose of wastes in a responsible manner and were taught about bio-degradable and non-biodegradable waste segregation.

VECTOR CONTROL:

- Participants were educated about the ways to prevent vector borne diseases such as malaria, dengue, chikungunya etc.,
- They were taught about using mosquito nets, insect repellent creams, preventing stagnation of water , etc.,

HIV & AIDS:

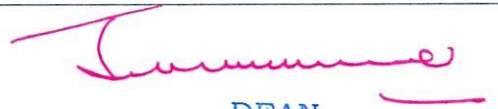

- The participants were taught about the methods of transmission of HIV-AIDS.
- They were taught about the symptoms and signs and were asked to report to a doctor if they indulged in unsafe sex or had any symptoms.
- They were taught about safe sex practices and other methods of prevention such as not sharing hypodermic needles, etc.,

OTHER SEXUALLY TRANSMITTED DISEASES:

- The workers were also educated about other sexually transmitted diseases , such are Syphilis, Chlamydia, Herpes, etc.,
- They were informed about the symptoms and to visit a doctor if symptoms persist.
- They were also taught about safe sex practices.

CONCLUSION:

- Thus, the importance of both communicable diseases and occupational safety was stressed.

Detailed Report of the Programme

With regards to the increasing prevalence of anaemia in our country, the CRRIs and the staffs of UHTC, Chrompet, conducted health education at UHTC, Chrompet. , we provided health education regarding prevalence types, causes symptoms, investigations prevention and treatment of anemia also about causes, symptoms, preventive methods, complications of non-communicable diseases like diabetes, hypertension.

We insisted about the primordial prevention of anemia by educating about the iron rich food items, further primary prevention like Prophylactic iron supplementation in pregnancy , post-partum and adolescence girls , then about treatment options available for treatment of various types of anaemia.

We also educated them about the routine screening tests to be done in diabetes like fundus examination, RFT, HbA1C etc., and the salt restricted diet in hypertension and about the complications like retinopathy, neuropathy, nephropathy, diabetic foot ulcer, MI, stroke etc., and the lifestyle modifications to be carried out like diet, exercise etc.,

Feedback:

- The participants understood the importance of this health education
- They came to know the consequences of anaemia
