Detailed report of the program

The lecture on "Communication Skills for MBBS Students" was held at the Lecture Hall 1 on for the benefit of the students. The hour-long lecture addressed the ways to take history and build rapport with patients Dr Sucharita discussed a few clinical scenarios and asked students to depict the situation. Students were taught skills like breaking the bad etc. Students participated enthusiastically and clarified their queries regarding specific career options. Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

Detailed report of the program

The lecture on "Communication Skills for MBBS Students" was held at the Lecture Hall 1 on 18/10/2018 for the benefit of the students. The hour-long lecture addressed the ways to take history and build rapport with patients. Shankar Anand gave examples of clinical scenarios that students might encounter and ideas on how to handle the same. There was a short session on Breaking bad news too. Students participated enthusiastically and clarified their queries. Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

Detailed report of the program

The lecture on "Communication Skills for MBBS Students" was held at Lecture Hall 1 on 03/11/2017 for the benefit of the students. The hour-long lecture addressed the ways to take history and build rapport with patients. The speaker Dr Sucharita gave clinical scenarios and asked students to depict the situation. Students were also taught skills like breaking the bad news and the medicolegal importance of good communication skills. Students participated enthusiastically and clarified their queries regarding specific case scenarios they have come across. Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

			Learn to manage stress through diet, sleep and other lifestyle factors Time Management to avoid stress during exams Develop a long-term action plan to Minimize and better manage stress
Objective of the Program	The primary objective of this workshop is to help students understand the significance of academic pursuits while addressing the challenges of stress and providing effective strategies for managing it in a positive manner. The workshop aims to empower students with valuable tips and advice to reduce stress and create a conducive environment for their overall well-being and academic success.		

Report of the program

The course was organized by the Department of General Medicine in association with the medical education unit. The course was organized for the students to manage and cope up stress during Examination.

The primary objective of this workshop is to help students understand the significance of academic pursuits while addressing the challenges of stress and providing effective strategies for managing it in a positive manner. The workshop aims to empower students with valuable tips and advice to reduce stress and create a conducive environment for their overall well-being and academic success.

Key Focus Areas:

- 1. Stress Awareness:** The workshop will raise awareness among students about the impact of stress on their academic performance, mental health, and overall quality of life. Understanding stress triggers and its effects is crucial in taking proactive measures.
- 2. Academic Importance:** Emphasizing the importance of academics will be a central theme,

highlighting the value of education and the pursuit of knowledge while managing stress effectively.

3. **Positive Stress Management:** The workshop will focus on promoting positive stress management techniques. Students will learn how to channel stress in a constructive manner to enhance productivity and motivation.
4. **Effective Coping Strategies:** Participants will be introduced to a variety of coping strategies to handle academic pressures, time management challenges, and emotional stressors in a healthy and productive way.
5. **Mindfulness and Self-Care:** The workshop will advocate mindfulness practices and the importance of self-care in maintaining mental and emotional well-being amidst academic commitments.
6. **Creating Supportive Environments:** Students will be encouraged to cultivate supportive relationships with peers, teachers, and family members to create a positive and nurturing academic environment.

Outcomes:

By the end of the workshop, participants can expect the following outcomes:

1. **Stress Awareness:** Students will be more aware of the factors causing stress in their academic life and how it affects their well-being.
2. **Stress Reduction:** Participants will have learned practical strategies to reduce stress and manage academic pressures more effectively.
3. **Improved Academic Performance:** By adopting positive stress management techniques, students can expect an improvement in their academic focus, motivation, and overall performance.
4. **Enhanced Well-being:** Understanding the importance of self-care and mindfulness will

contribute to improved mental and emotional well-being.

5. **Empowerment:** Students will feel empowered to take charge of their stress levels, making proactive choices that lead to a healthier and more balanced academic life.

Conclusion:

The stress management workshop aims to instil in students the understanding that academics are crucial, but they should not come at the cost of their mental and physical well-being. By providing practical advice and effective stress reduction strategies, the workshop seeks to empower students to navigate academic challenges with resilience, maintaining a positive outlook and a healthy balance in their lives.

Course completion certificate was given to all the participants and feedback was also obtained from the students.

Detailed report of the program

On February 7, 2022, a Basic English Skills class was conducted at the auditorium of Tagore Medical College, aiming to equip medical students with essential English grammar knowledge and enhance their communication and comprehension skills. The instructors covered crucial aspects including vocabulary, grammar, pronunciation, and medical-specific terminology. Interactive teaching methods such as group discussions and role-plays fostered active engagement, allowing practical application of the acquired skills. The students demonstrated enthusiasm and acknowledged the direct relevance of the class content to their future medical careers. Overall, the class successfully instilled fundamental English language skills, bolstering their confidence in effective communication. These skills are expected to greatly benefit their interactions with patients and healthcare professionals at Tagore Medical College. Positive feedback from the students highlighted their desire for regular lectures of similar nature in the future.

Detailed report of the program

On February 12, 2021, a Basic English Skills class was conducted at the auditorium of Tagore Medical College. The objective of the class was to familiarize the medical students with the basics of English grammar and improve their communication and comprehension skills. The instructors covered essential aspects such as vocabulary, grammar, pronunciation, and medical-specific terminology. Interactive teaching methods like group discussions and role-plays encouraged active participation, enabling practical application of the learned skills. The students displayed enthusiasm and recognized the relevance of the class content to their future medical practice. Overall, the class successfully equipped the students with fundamental English language skills, enhancing their confidence in communicating effectively. These skills are expected to facilitate improved communication and comprehension abilities in their interactions with patients and healthcare professionals at Tagore Medical College. The class also followed strict COVID-19 protocols to ensure the safety and well-being of all participants. The students provided positive feedback and expressed their desire for more such lectures to be held regularly in the future.

Detailed report of the program

On August 28, 2019, a Basic English Skills class was conducted at the auditorium of Tagore Medical College. The objective of the class was to familiarize the medical students with the basics of English grammar and improve their communication and comprehension skills. The instructors covered essential aspects such as vocabulary, grammar, pronunciation, and medical-specific terminology. Interactive teaching methods like group discussions and role-plays encouraged active participation, enabling practical application of the learned skills. The students displayed enthusiasm and recognized the relevance of the class content to their future medical practice. Overall, the class successfully equipped the students with fundamental English language skills, enhancing their confidence in communicating effectively. These skills are expected to facilitate improved communication and comprehension abilities in their interactions with patients and healthcare professionals at Tagore Medical College.

Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

Detailed report of the program

On September 14, 2018, a Basic English Skills class was conducted at the auditorium of Tagore Medical College. The objective of the class was to familiarize the medical students with the basics of English grammar and improve their communication and comprehension skills. The instructors covered essential aspects such as vocabulary, grammar, pronunciation, and medical-specific terminology. Interactive teaching methods like group discussions and role-plays encouraged active participation, enabling practical application of the learned skills. The students displayed enthusiasm and recognized the relevance of the class content to their future medical practice. Overall, the class successfully equipped the students with fundamental English language skills, enhancing their confidence in communicating effectively. These skills are expected to facilitate improved communication and comprehension abilities in their interactions with patients and healthcare professionals at Tagore Medical College.

Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

Detailed report of the program

On September 12, 2017, a Basic English Skills class was conducted at the auditorium of Tagore Medical College. The objective of the class was to familiarize the medical students with the basics of English grammar and improve their communication and comprehension skills. The instructors covered essential aspects such as vocabulary, grammar, pronunciation, and medical-specific terminology. Interactive teaching methods like group discussions and role-plays encouraged active participation, enabling practical application of the learned skills. The students displayed enthusiasm and recognized the relevance of the class content to their future medical practice. Overall, the class successfully equipped the students with fundamental English language skills, enhancing their confidence in communicating effectively. These skills are expected to facilitate improved communication and comprehension abilities in their interactions with patients and healthcare professionals at Tagore Medical College.

Overall, there was positive feedback from the medical students. For future suggestions, they requested more such lectures to be held regularly.

Detailed report of the program

The workshop titled "Basic Tamil Skills for Medical Students" was held at Tagore Medical College on February 11, 2022. The venue for the workshop was the 4th-floor auditorium, and the session took place from 10 am to 12 pm. The main objective of the workshop was to equip medical students with indispensable Tamil language skills, specifically tailored to enhance their ability to communicate effectively with Tamil-speaking patients.

The workshop featured an interactive lecture delivered by language experts who covered essential aspects such as key vocabulary, basic grammar, and medical phrases relevant to the medical field. The students actively participated in conversations and actively engaged in practical exercises, role-plays, and simulations to apply their newly acquired language skills in realistic medical scenarios.

Detailed report of the program

On April 12, 2021, a workshop titled "Basic Tamil Skills for Medical Students" was conducted at Tagore Medical College. The workshop took place in the 4th-floor auditorium from 10 am to 12 pm. Its objective was to equip medical students with essential Tamil language skills to enhance communication with Tamil-speaking patients. The session included an interactive lecture by language experts, covering key vocabulary, basic grammar, and medical phrases. Students actively participated in conversations and engaged in practical exercises, role-plays, and simulations. The workshop received positive feedback from participants, who appreciated the opportunity to learn crucial Tamil language skills for effective doctor-patient communication.

Detailed report of the program

On August 29, 2019, a workshop titled "Basic Tamil Skills for Medical Students" was conducted at Tagore Medical College. The workshop took place in the 4th-floor auditorium from 10 am to 12 pm. The primary objective of the workshop was to equip medical students with essential Tamil language skills, enabling them to communicate effectively with Tamil-speaking patients.

The workshop featured an engaging lecture by language experts who covered key vocabulary, basic grammar, and medical phrases specifically relevant to the medical field. Students actively participated in conversations, practical exercises, role-plays, and simulations, allowing them to apply their newly acquired language skills in realistic medical scenarios.

The workshop received positive feedback from the participants. The students expressed their appreciation for the interactive nature of the session, which made learning Tamil enjoyable and practical. They found the lecture informative and found the practical exercises particularly beneficial in improving their communication skills. Overall, the workshop was highly successful in equipping medical students with the necessary Tamil language skills to better connect with Tamil-speaking patients.

Detailed report of the program

The workshop titled "Basic Tamil Skills for Medical Students" was held at Tagore Medical College on September 13, 2018. The venue for the workshop was the 4th-floor auditorium, and the session took place from 10 am to 12 pm. The main objective of the workshop was to equip medical students with indispensable Tamil language skills, specifically tailored to enhance their ability to communicate effectively with Tamil-speaking patients.

The workshop featured an interactive lecture delivered by language experts who covered essential aspects such as key vocabulary, basic grammar, and medical phrases relevant to the medical field. The students actively participated in conversations and actively engaged in practical exercises, role-plays, and simulations to apply their newly acquired language skills in realistic medical scenarios.

Detailed report of the program

On September 11, 2017, a workshop called "Basic Tamil Skills for Medical Students" was held at Tagore Medical College. The workshop took place in the 4th-floor auditorium from 10 am to 12 pm. The main aim of the workshop was to help medical students learn important Tamil language skills so that they could effectively communicate with Tamil-speaking patients. During the workshop, language experts gave an interactive lecture covering key vocabulary, basic grammar, and medical phrases relevant to the medical field. The students actively participated in conversations and practical exercises, such as role-plays and simulations, to practice using their newly learned language skills in real medical situations.

Detailed report of the program

Tagore Medical College and Hospital organized a short course on YOGA and MEDITATION aimed at promoting physical and mental well-being among the students. The course was conducted in the college auditorium premises in the month of April 2022 Prof Dr Kumudha Lingraj, the Dean of the college, presided over the course. The resource person for the program was Prof Dr Damodaran, a psychologist, and faculty member of Art of Living, renowned for his expertise in Yoga and Meditation.

Course Structure and Participation: A total of 161 students registered for the course and actively attended the sessions. The course was designed to include both theoretical knowledge and practical experience in Yoga and Meditation techniques. Prof Dr Damodaran, with his profound knowledge in the field, delivered insightful lectures on the significance of Yoga and Meditation for mental and physical well-being.

Group YOGA Sessions: One of the highlights of the course was the group Yoga sessions conducted by Prof Dr Damodaran. These sessions made the learning experience more engaging and interactive. The audience was actively involved in performing various Yoga poses, which added a practical aspect to the theoretical knowledge shared during the lectures.

Benefits and Course Completion: The Yoga and Meditation course aimed to provide participants with effective tools to manage stress, anxiety, and other challenges commonly faced during their study period. Through regular practice of Yoga and Meditation, the students were encouraged to enhance their focus, concentration, and overall mental clarity.

At the end of the course, all participants were awarded course completion certificates, acknowledging their commitment to learning and adopting these beneficial practices in their daily lives.

Impact and Conclusion: The Yoga and Meditation course organized by Tagore Medical College and Hospital had a positive impact on the participating students. By providing practical techniques to cope with stress and improve mental well-being, the course contributed to the overall health and happiness of the students.

Promoting mental well-being among students is vital, especially during their academic journey,

which can be demanding and challenging. By incorporating Yoga and Meditation practices, the college demonstrated its commitment to the holistic development of its students.

Overall, the course proved to be a successful initiative in promoting the significance of Yoga and Meditation as tools for stress management and improving overall mental and physical health. The participants benefited greatly from the program, equipping them with lifelong skills to maintain a balanced and healthy lifestyle. The efforts of the college and the resource person, Prof Dr Damodaran, are commendable for providing students with valuable knowledge and experiences through this course.

			Warrior Poses (Virabhadrasana I, II, and III) Tree Pose (Vrikshasana) Cobra Pose (Bhujangasana) Child's Pose (Balasana) Corpse Pose (Savasana) DAY 3 Group Yoga practise session
Objective of the Program	Objective of the Yoga workshop is to offer participants a transformative experience, not only by teaching practical techniques but also by providing the broader context and understanding of Yoga as a science of self-improvement, spiritual growth, and harmonious living.		

Detailed report of the program

The event organized by Tagore Medical College and Hospital. The course on Yoga and Meditation took place on the 19th, 20th, and 21st of August 2019 in the college auditorium premises, organized by the Department of Community Medicine. The Organizing Secretary for the event was Dr. R. C. Karthik, who is an MD Assistant Professor in the Department of Community Medicine.

The inaugural program commenced with the presence of two distinguished guests: Dean Dr. Gunasekaran and Medical Superintendent Dr. Thirunarayanan. Their presence added significance to the event and showcased the support from the medical college.

The course was led by Prof. Dr. Damodharan, a PhD holder in Yoga and a Psychologist. He is also associated with the Art of Living and is a Faculty member in the Youth Leadership Training Program. Having an expert like him as the resource person ensured a high-quality and insightful learning experience for the attendees.

The event saw active participation from 150 students who registered and attended the course. The group Yoga sessions must have been particularly engaging, as the audience was also allowed to perform various

poses. This interactive approach likely made the sessions more enjoyable and helped the participants connect with the practice of Yoga.

Upon the successful completion of the course, the participants were awarded course completion certificates. This recognition must have encouraged the students and given them a sense of achievement for taking part in the program.

Overall, the Yoga and Meditation course proved to be highly beneficial, with all students attending the course enthusiastically. The program aimed to equip the students with tools to handle various issues and stress during their study period, promoting physical and mental well-being among the participants. Such initiatives are essential for nurturing the overall health of students and promoting a positive learning environment.

graduate curriculum and explained the various steps involved in conducting biomedical research.

The various modes of literature search were explained in details. This was followed by the session on research study designs. He discussed the types of quantitative and qualitative study designs with appropriate example.

Dean Tagore medical college and hospital addressed the participants on day 2. He emphasized on the need for conducting research and the importance of learning updating ourselves with latest guidelines and treatment protocols. This was followed by session on sample methods and sample size calculation by, Dept of Community medicine. He discussed the various methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session, the application of statistics in medical search was discussed. They highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis.

A Group activity was conducted after teaching sessions in which the participants were divided into four groups and were asked to prepare a thesis proposal. This was facilitated by the resource persons and the participants were asked to present the proposals developed by them and necessary corrections were done by the resource persons. All the sessions were followed by group activity where the participants were actively involved in problem Solving.

Report of the program

The Event began at 9am Dr.Balaji, Prof and Hod, Department Of Community Medicine, Tmch, gave the welcome address and formally introduced the resource persons to the participants. After the self-introduction of the participants, pre-test was conducted after Pre-Test.

The First session on introduction and steps in medical research was taken by dr.a.balaji. He highlighted the importance of research in post graduate curriculum and explained the various steps involved in conducting biomedical research.

The various modes of literature search was explained in details. This was followed by the session on research study designs by Dr.C.Sivagurunathan, Associate Professor, Community Medicine. He discussed the types of quantitative and qualitative study designs with appropriate example. The following tea break, Dr.N.Gunasekaran, Dean Tagore medical college and hospital addressed the participants. He

emphasized on the need for conducting research and the importance of learning updating ourselves with latest guidelines and treatment protocols. This was followed by session on sample methods and sample size calculation by Dr.Balaji, Prof and Hod. Dr.M.Ezhilvanan, Statiscian. Discussed the various methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session, the application of statistics in medical search was discussed by Dr.A Balaji & Dr.M.Ezhilvanan. They highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis.

A Group activity in which the participants were divided into four groups and were asked to prepare a thesis proposal. This was facilitated by the resource persons and the participants were asked to present the proposals developed by them and necessary corrections were done by the resource persons. All the sessions were followed by group activity where the participants were actively involved in problem Solving.

Objective of the Program	Primary objective of the present course is to provide students with comprehensive knowledge and training in research methodology. The course aims to equip participants with essential skills and understanding necessary for conducting high-quality research and writing research articles effectively. It will cover various aspects of research, including ethics, formulating research processes, research problems, citation methods, and other key components of research methodology
--------------------------	--

Detailed report of the program

The course was organized by the Department of Community medicine The course was organized for the students to get to give hands on training and basic knowledge about research methodology.

The course was started with the inaugural program organized by the head of the department of Microbiology. Dean Dr. Gunasekaran and Medical Superintendent Dr. Thiru Narayanan addressed the gathering.

The First session on introduction and steps in medical research was highlighted the importance of research in undergraduate curriculum and explained the various steps involved in conducting biomedical research.

Followed by which the learning sessions by Resource Person Dr. I Kannan Associate Professor, Dept of Microbiology TMCH gave a wide range training for the students regarding Research methodology Course completion certificate was given to all the participants and feedback was also obtained from the students.

	<p>covered in the Analytical Skills Development.</p> <p>This workshop includes sessions which will use combination of lecture and skill-building exercises, each session in the series focuses on a key component of analytical skill development</p>
--	---

About the program

The course was organized by the Department of Psychiatry. The course was organized for the students to get trained about the Analytical skills and various exercises and tools. Dr. P Balachandran gave an brief introduction about the Analytical skills (module 1) which is crucial in the field of psychology as they enable professionals to critically evaluate and interpret research data, assess problems and develop effective strategies for intervention and treatment.

Critical thinking tools in module 2 in which the resource person spoke about evaluating existing theories, research studies, and methodologies. By considering different perspectives and challenging assumptions, professionals can contribute to the field's growth and improve the quality of psychological science.

The modules also covered problem solving, decision making. The participants also learned how to gather and analyse data effectively identify pattern and trends and make informed decision based on the finding

The course module also covered techniques for effective communication of analytical results including how to communicate effectively with the stakeholder ie, patients or attendant. The participants also had workshop to practice their analytical skills through hands-on exercises. They also received feedback from the facilitator.

By the end of the course the participants have developed a solid foundation in core analytical ability to manage complex problems and make organizational success.

Pre test and post test analysis were done. Upon completion of all the Modules the participants were given course completion certificate.

Detailed report of the program

The Department of General Medicine organized a hybrid workshop on ECG, which took place on January 28, 2022, in the College Auditorium from 9:00 am to 5:00 pm. The primary objective of the workshop was to actively engage students through interactive lectures, quiz sessions, and the simplified interpretation of ECG led by Dr Guru Prasath, Interventional Cardiologist.

The interactive nature of the sessions, combined with the profound knowledge and expertise of Dr Guru Prasath, significantly contributed to the overall learning experience of the participants. The workshop not only expanded their knowledge but also equipped them with practical skills that are highly relevant to their future careers in the medical field.

To evaluate the effectiveness of the session, both a pre-test and a post-test were administered, enabling a comprehensive analysis of the students' progress. This assessment method allowed for a thorough understanding of the impact the workshop had on the participants' understanding of ECG fundamentals.

The participants expressed great satisfaction with the workshop, emphasizing its value in enhancing their comprehension of the basic concepts of ECG.

Detailed report of the program

The program commenced at approximately 8:45 am with the registration and assembly of Final year MBBS students and CRRIs in Lecture Hall -1. At 9 am, the program was initiated by our esteemed Dean, Dr. Gunasekaran, who addressed the students and guests, emphasizing the importance of Basic Electrocardiogram (ECG) to all participants.

Subsequently, all students were requested to attend a Pre-test on ECG to assess their existing knowledge on the topic. They were given a duration of 20 minutes to complete the test.

Following the Pre-test, the first session began around 10 am. Dr. Chenniyappan, the guest speaker and Chairman of Ramakrishna Nursing Home, delivered a comprehensive lecture on the significance of Basic and Advanced ECG in day-to-day life. Dr. Chenniyappan provided real data, figures, and informative animations, along with videos depicting real-life incidents related to cardiac diseases. This engaging session was thoroughly enjoyed and appreciated by both the students and faculty members.

The second session commenced with a brief introduction to Electrolytes and ECG, followed by an in-depth discussion on ECG as ECHO - covering topics such as Congenital Heart Disease and Acquired Heart Disease. Furthermore, Dr. Chenniyappan provided detailed explanations about the uses of ECG as a diagnostic tool. A 10-minute break was given to the students to prepare themselves for the next Quiz Session, and light snacks were provided to all the students.

Detailed report of the program

On February 17, 2022, an extensive orientation program on the "Significance of Doctors in Society" was led by Dr. Swathi, an esteemed Assistant Professor in the Department of Anatomy at Tagore Medical College. The program, held in Lecture Hall 1 from 8.30 - 10.30 AM, aimed to provide an insightful understanding of the multifaceted responsibilities, ethical principles, and societal impact associated with the medical profession.

During the program, Dr. Swathi delved into the historical evolution of the medical field, highlighting its vital role in the advancement of human health and well-being. Emphasizing the significance of patient-centered care, she underscored the crucial attributes of empathy, compassion, and effective communication for healthcare professionals.

Furthermore, the program explored the broader scope of the medical profession, addressing the role of doctors in promoting public health, preventive medicine, and community outreach initiatives. Dr. Swathi engaged the students in thought-provoking discussions and interactive sessions, allowing them to grasp the practical implications of their future roles in society.

The orientation program served as a pivotal foundation for the aspiring doctors, enlightening them on the profound responsibilities they will undertake in their medical careers. It provided a platform for students to cultivate a sense of social responsibility and foster a deep understanding of the positive impact they can make in the lives of individuals and communities.

Detailed report of the program

On February 25, 2021, Dr. Esther, an Associate Professor in the Department of Community Medicine at Tagore Medical College, organized an orientation program on the "Role of Doctors in Society" for first-year MBBS students. The program, held in Lecture Hall 1, aimed to provide students with an overview of the responsibilities, ethical principles, and societal impact associated with the medical profession. Dr. Esther discussed the historical evolution of the medical field, the importance of patient-centered care, and the role of doctors in public health and community outreach programs. The orientation program served as a foundation for students as they embarked on their journey to become healthcare professionals.

Detailed report of the program

Dr. Saveetha, an esteemed Assistant Professor in the Department of Anatomy at Tagore Dental College, delivered a captivating lecture on the "Role of Doctors in Society" to first-year MBBS students. The session, held on 03/8/2019 from 8:30 to 10:30 AM in Lecture Hall 1, proved to be an invaluable platform for students to grasp the depth of their future roles as healthcare professionals and comprehend the significant impact they could have on societal well-being. With a strong emphasis on empathy, effective communication, and adherence to ethical principles in patient care, Dr. Saveetha highlighted the vital importance of these qualities in the medical profession. The lecture provided an insightful exploration of the multifaceted responsibilities of doctors, underscoring their role in shaping and improving the communities they serve.

Detailed report of the program

On 18/9/2018, Dr. D H Gopalan, from Department of Anatomy at Tagore Medical College, conducted a lecture on the "Role of Doctors in Society" for first-year MBBS students. The lecture took place in Lecture Hall 1 from 8:30 to 10:30 am. Dr. D H Gopalan extensively covered the historical evolution of the medical profession, emphasized ethical principles guiding medical practice, and underscored the significance of empathy and effective communication in patient care. The lecture aimed to equip students with a comprehensive understanding of their future responsibilities as doctors and their profound impact on society's well-being. The session provided valuable insights into the multifaceted nature of the medical profession.

Detailed report of the program

On September 22, 2017, Dr. D H Gopalan, from Department of Anatomy at Tagore Medical College, conducted a lecture on the "Role of Doctors in Society" for first-year MBBS students. The lecture took place in Lecture Hall 1 from 8:30 to 10:30 am. Dr. D H Gopalan extensively covered the historical evolution of the medical profession, emphasized ethical principles guiding medical practice, and underscored the significance of empathy and effective communication in patient care. The lecture aimed to equip students with a comprehensive understanding of their future responsibilities as doctors and their profound impact on society's well-being. The session provided valuable insights into the multifaceted nature of the medical profession.

Detailed report of the program

The course was organized by the Medical education unit. The course was organized for the students to get familiarize with the basic about computer and Basic of windows 10 How to create , share and collaborate documents using Google drive ,MS Word 2016, windows defender, Ms Excel 2016, Ms Word 2016, Ms Power point 2016, create voice narration , Rotating object, professional presentation, Hyperlinks, hand on workshop. A total of 159 registered for the course. Total 150 students were benefited

Course completion certificate was given to all the participants and feedback was also obtained from the students. Overall the course would benefit the students to handle seminar presentation, Research projects etc.

	<p>Enhanced Computer Proficiency: Participants will gain a strong foundation in computer basics, enabling them to navigate digital tools and technologies with ease.</p> <p>Confident Presentations: Healthcare professionals will have the skills to create and deliver engaging and professional presentations, effectively conveying their research findings and medical knowledge.</p> <p>Improved Research Abilities: Participants will be better equipped to conduct research activities, analyse data, and review medical literature, contributing to evidence-based healthcare practices.</p> <p>Efficient Data Management: Healthcare professionals will possess the knowledge and skills to handle patient data and research data responsibly and securely.</p> <p>Streamlined Collaboration: Understanding digital collaboration tools will enable participants to work efficiently with colleagues and research teams, improving overall productivity.</p>
--	---

Detailed report of the program

The Medical Education Unit organized a comprehensive course to familiarize students with computer basics and the fundamentals of Windows 10. The course also covered essential skills in creating, sharing, and collaborating on documents using various software tools, including Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, and MS PowerPoint 2016. Additionally, students learned how to incorporate voice narration, rotating objects, creating professional presentations, using hyperlinks, and participated in hands-on workshops.

Course Details:

- Organizer: Medical Education Unit
- Purpose: To familiarize students with computer basics and various software tools for document creation and collaboration.

Rathinamangalam, Melakkottaiyur Post, Chennai - 600 127.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

- Topics Covered: Computer basics, Windows 10, Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, MS PowerPoint 2016, voice narration, rotating objects, creating professional presentations, and using hyperlinks.

Participants and Beneficiaries:

A total of 163 students registered for the course, and 160 students benefited from the training. The course received positive feedback and appreciation from the participants.

Course Completion and Feedback:

All participants received course completion certificates upon successfully completing the training. Feedback was actively sought from the students to evaluate the effectiveness of the course and identify areas for improvement.

Benefits for Students:

The course proved to be highly beneficial for the students in various aspects:

1. **Enhanced Computer Skills:** Participants gained proficiency in using computers and various software tools, empowering them to navigate the digital world confidently.
2. **Document Collaboration:** Learning how to create, share, and collaborate on documents using tools like Google Drive and MS Word 2016 prepared students for effective teamwork and seamless document management.
3. **Presentation Skills:** The course equipped students with the knowledge and skills to create professional presentations, including voice narration and rotating objects, enhancing their ability to deliver impactful seminars and projects.
4. **Research Project Support:** The acquired computer and software skills are invaluable for conducting research projects efficiently and producing high-quality outputs.

The course organized by the Medical Education Unit effectively empowered students with computer and software proficiency. The knowledge gained in document creation, collaboration, and presentation skills will serve the participants well in their academic pursuits, seminar presentations, and research projects. The initiative of providing hands-on training and engaging with various software tools ensured that the students can apply these skills effectively in their academic and professional lives.

Objective of the Program	The primary objective of this program is to provide healthcare professionals with essential knowledge about the basics of computers, equipping them with valuable skills for their future presentations, research activities, and data reviewing.
--------------------------	---

Detailed report of the program

The Medical Education Unit organized a comprehensive course aimed at familiarizing students with computer basics and the fundamentals of Windows 10. The course also covered practical training in creating, sharing, and collaborating on documents using various MS Office applications, Google Drive, and Windows Defender. The program was designed to equip students with essential computer skills, enhancing their proficiency in handling seminar presentations, research projects, and other academic tasks.

Course Details:

- **Organizer:** Medical Education Unit
- **Purpose:** To familiarize students with computer basics and MS Office applications for document creation and collaboration.
- **Topics Covered:** Computer basics, Windows 10, Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, MS PowerPoint 2016, voice narration, rotating objects, creating professional presentations, and using hyperlinks.
- **Total Beneficiaries:** A total of 154 out of 158 students were benefited from the course.
- **Course Duration:** The course was conducted on four Saturdays from 9:00 am to 1:00 pm.
- **Venue:** The course took place in the lecture hall
- **Resource Person:** Mr. Anil Jenifer, B.Tech, served as the resource person for the course, providing expert guidance and practical training.

DEAN
TAGORE MEDICAL COLLEGE & HOSPITAL
RATHINAMANGALAM, MELAKOTTAIYUR POST,
CHENNAI-600 127.

TAGORE MEDICAL COLLEGE & HOSPITAL

(Approved by M.C.I. and Govt. of India and affiliated to the Tamil Nadu Dr. MGR Medical University)

Rathinamangalam, Melakkottaiyur Post, Chennai - 600 127.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

Course Content: The course commenced with an introduction to computer basics and an overview of Windows 10, ensuring that students were well-versed with the fundamental aspects of computing. Subsequently, hands-on workshops were conducted on Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, and MS PowerPoint 2016, enabling participants to gain practical experience in using these essential software tools. Moreover, students learned how to create voice narrations, rotate objects, and develop professional presentations with the inclusion of hyperlinks.

Outcome: Upon successful completion of the course, participants received course completion certificates, acknowledging their acquired computer skills. Feedback was collected from the students, and the overall response was positive, indicating the effectiveness of the training.

Benefits for Students: The course provided significant benefits to the students, including:

1. **Enhanced Computer Proficiency:** Participants gained confidence and proficiency in using computers and various MS Office applications.
2. **Improved Productivity:** Knowledge of efficient document creation and collaboration techniques allowed students to optimize their academic work.
3. **Better Presentations:** Students acquired skills to create professional and engaging presentations, adding value to their seminar and research projects.
4. **Academic Advantages:** The acquired computer skills positioned the students to excel in various academic tasks, contributing to their overall performance.

Conclusion: The Computer Basics and MS Office course organized by the Medical Education Unit proved to be highly beneficial for the students. Equipped with essential computer skills and practical knowledge, the participants were well-prepared to handle seminar presentations, research projects, and other academic activities more effectively. The course's success highlights the significance of incorporating computer education in the academic curriculum, empowering students to thrive in the digital age.

			chemical structures from pubchem and ZINC database Preparation of ligand – Drug designing software- ACD chemsketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The objective of the present course is to give hands on training in application of various online tools and software in drug development for diseases. The participants will be given with examples after the demonstration of various techniques to understand and apply them in drug development		

Report of the program

The course was organized by the Medical Education Unit. The course was organized for the Postgraduates to get to give hands on training in application of various online tools and software's in drug development for diseases.

The program started with the addressing the students by the MEU Coordinator Dr. DH. Gopalan. HE Introduced the speakers and later on the course was started.

The first speaker Dr. Venkataraman gave a brief note about Molecular docking which is a powerful computational technique used in drug discovery and design. It plays a crucial role in understanding the interactions between ligands (small molecules or potential drugs) and target proteins (usually enzymes or receptors) at the molecular level.

The second speaker spoke about Principles of Molecular Docking which include Ligand Preparation. Protein Preparation, Docking Algorithm.

The third speaker covered about Applications of Molecular Docking like Lead Optimization,

Virtual Screening, Prediction of Binding Modes, Identification of Off-Target Effects, Fragment-Based Drug Design, De Novo Drug Design: Challenges in Molecular Docking, Scoring Function Accuracy

Conclusion: Molecular docking is an indispensable computational tool in modern drug discovery and design. Its ability to predict ligand-receptor interactions provides valuable insights into the molecular basis of drug-target interactions. By assisting in lead optimization, virtual screening, and de novo drug design, molecular docking accelerates the drug development process, making it an essential component in the quest for new therapeutic agents.

As computing power and algorithms continue to advance, molecular docking will play an increasingly critical role in the identification and optimization of drug candidates, ultimately leading to improved treatments and better healthcare outcomes. However, researchers must be mindful of the limitations and challenges associated with docking techniques and adopt appropriate validation methods to ensure the reliability of their results.

Course completion certificate was given to all the participants and feedback was also obtained from the students.

			Preparation of ligand – Drug designing software- ACD chemsketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The objective of the present course is to give hands on training in application of various online tools and software in drug development for diseases. The participants will be given with examples after the demonstration of various techniques to understand and apply them in drug development		

Report of the program

The course was organized by the Department of Anatomy The course was organized for the students to get to give hands on training in application of various online tools and software in drug development for diseases. The course started with the introduction of the speakers by the Head of Dept of Anatomy & MEU coordinator Dr. DH Gopalan. He introduced the following three speakers for the course.

SPEAKERS

VDr. Natarajan Venkataraman an M.Sc.,Ph.D.

Professor, Saveetha Dental College & Hospitals

Dr.A.Suvitha B.Sc.,M.Sc.,P.hd in chemistry

Associate Professor of chemistry ,Thassim Beevi Abdul Kader College for Women Kalamkari

Dr. I. Kannan, M.Sc.,P.hd

Associate Professor of Microbiology, Tagore Medical College and Hospital

The first speaker Dr. Venkataraman gave a brief note about Molecular docking which is a powerful computational technique used in drug discovery and design. It plays a crucial role in understanding the interactions between ligands (small molecules or potential drugs) and target proteins (usually enzymes or receptors) at the molecular level.

The second speaker spoke about Principles of Molecular Docking which include Ligand Preparation. Protein Preparation, Docking Algorithm.

The third speaker covered about Applications of Molecular Docking like Lead Optimization, Virtual

		lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The objective of the present course is to give hands on training in application of various online tools and software's in drug development for diseases. The participants will be given with examples after the demonstration of various techniques to understand and apply them in drug development	

Detailed report of the program

The computer Aided Drug Designing course, held on 4th, 5th & 6th August 2022, was an informative course organized and conducted by the Department of Microbiology. The event aimed to provide a platform for the field of molecular docking. The event aimed to provide a platform for knowledge exchange networking and discussions on the latest advancements, challenges and future prospects in the field

A brief introduction about Molecular Docking which is computational technique was given by the speaker Dr. I Kannan. He shared his expertise and insight on molecular docking. AN extensive review of basic principles, methodologies and applications of molecular docking in various field of research and its importance in drug discovery was explained in detail during the course.

Recap of the importance of molecular docking in various research areas. Discussions and workshops encouraged active student participation and led to fruitful exchanges of ideas. Parallel workshops were also conducted during the event allowing attendees to gain hands-on experience with popular molecular docking software and tools. Summary of challenges and future directions for the field.

Participants had opportunity to learn practical aspects of docking simulations, scoring functions and results analysis, enhancing their understanding of the subject matter.

In 2020-2021 batch a total of 142 and Supplementary batch 28 students registered for the course. Total 170 students were benefited with the course.

			designing software- ACD chemsketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The primary objective of the present course is to provide participants with hands-on training in the application of various online tools and software in the field of drug development for diseases. The course is designed to equip attendees with practical knowledge and skills, enabling them to effectively use digital resources for drug discovery and development.		

Detailed report of the program

The Department of Microbiology organized a hands-on training course on the application of various online tools and software in drug development for diseases. The course aimed to equip students with practical knowledge and skills to utilize digital resources effectively in the field of drug development. The program was led by Dr. I Kannan, Associate Professor in the Department of Microbiology.

Objective: The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.

Batch Details:

- Regular Batch (2018-2019): 146 students registered
- Supplementary Batch: 13 students registered

Total Participants: The course successfully benefited a total of 1159 students from both the regular and supplementary batches.

Course Content: The training program covered the following key aspects:

1. Introduction to Drug Development: An overview of the drug development process, including identification, design, and testing of potential drugs.
2. Online Tools and Software: Demonstrations and practical sessions on using various online tools and software specifically tailored for drug development purposes.
3. Real-world Examples: The participants were provided with relevant examples and case studies

to better understand the practical application of the demonstrated techniques.

4. Hands-on Practice: The participants actively engaged in hands-on practice during the course, gaining valuable experience in using digital resources.

Resource Person: Dr. I Kannan, an esteemed Associate Professor in the Department of Microbiology, served as the resource person for the course. His expertise in the field and passion for teaching ensured that the participants received valuable insights and guidance.

Course Completion and Feedback: Upon successful completion of the training, all participants were awarded course completion certificates. Feedback from the students was actively sought to assess the effectiveness of the program and identify areas for improvement in future editions.

Conclusion: The hands-on training course on online tools and software in drug development for diseases organized by the Department of Microbiology proved to be highly beneficial for the participating students. By gaining practical experience in utilizing digital resources, the participants enhanced their skills and knowledge in drug development, contributing to their overall academic and professional growth. The success of the program indicates the importance of incorporating such practical training initiatives to equip students with relevant and applicable skills in their chosen fields of study.

			Preparation of ligand – Drug designing software- ACD Che sketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.		

Report of the program

The course was organized by the Department of Microbiology. The course was organized for the students to get to give hands on training in application of various online tools and software in drug development for diseases.

The course was started with the inaugural program organized by the head of the department of Microbiology. Dean Dr. Gunasekaran addressed the gathering. Followed by which the learning sessions were started.

The event aimed to provide a platform for the field of molecular docking. The event aimed to provide a platform for knowledge exchange networking and discussions on the latest advancements, challenges and future prospects in the field

A brief introduction about Molecular Docking which is computational technique was given by the speaker Dr. I Kannan. He shared his expertise and insight on molecular docking. AN extensive review of basic principles, methodologies and applications of molecular docking in various field of research and its importance in drug discovery was explained in detail during the course.

Recap of the importance of molecular docking in various research areas. Discussions and workshops encouraged active student participation and led to fruitful exchanges of ideas. Parallel workshops were also conducted during the event allowing attendees to gain hands-on experience with popular molecular docking software and tools. Summary of challenges and future directions for the field.

Detailed report of the program

The Program was started around 8.45 am with online pre-test The program commenced with welcome note given by Prof &HOD **Dr.P.R.Thenmozhiwalli M.D** Department of Microbiology by welcoming Prof **Dr. Kumudha Lingaraj**, Dean and Prof Dr. **Dr. Karunanidhi**, Medical superintendent.

Later, the participants were asked to fill the pre-test questionnaire. They completed the test around 9.00 am. After the Pre-test, around 9.05am, Introduction about Hospital acquired infection was given by Prof & HO **D. Dr.P.R.Thenmozhiwalli M.D**. First session started with **Dr.P.R.Thenmozhiwalli M.D**, Professor, Department of Microbiology, TMCH. She nicely elaborated on the Hospital infection control. The Second session started around 10.22 am by **Dr. E.Premalatha**, Associate professor, Department of Microbiology, TMCH. She explained in detail about Application of Antimicrobial stewardship in HIC. A Break of 10mins is given to the students.

The third session started around 1pm and continued till 5.00 pm. All students were divided into batches demonstration given on Biomedical waste disposal, Management of needle stick injury, Steps of Hand hygiene and Proper disinfection of spill by Dr.I.Kannan Msc, PhD (Asst Prof, Microbiology) Mrs.Sony paul Msc (Asst. Prof., Microbiology) Dr. C.Malini Evangeline Rose, MD (Asst. Prof., Microbiology), Dr.P.Savetha M.D (Asst. Prof., Microbiology) Dr. C.H.Naga Prashanthi, MD M.D(Asst. Prof., Microbiology), Dr.Vinothin MD(TUTOR)., which students found very interesting and informative. Subsequently, Post test was conducted with the same questionnaire as pre-test to evaluate the knowledge gained by the participants after the session. By comparing the data of pre-test and post test data it is evident that students scored better in post-test. Session ended with certificate distribution to all the participants. And vote of thanks by, **Dr.Savetha** , Asst. Professor ,Department of Microbiology, TMCH.

The program commenced with Tamil Thai Vaazhthu, followed by welcome note given by Prof &HOD Dr.R.G.Sukumar M.D, Department of Microbiology by welcoming Prof Dr. N.Gunasekaran M.D, DTCD, Dean and Prof Dr. K.Thirunarayanan MS, Medical superintendent. Later, the participants were asked to fill the pre-test questionnaire.

They completed the test around 9.00 am. After the Pre-test, around 9.05 am, Introduction about Hospital acquired infection was given by Prof & HOD.R.G. Sukumar M.D. First session started with Dr.Shanthi Banukumar M.D, Professor, Department of Microbiology, TMCH. She nicely elaborated on the Hospital infection control. The Second session started around 10.22 am by Dr. E.Premalatha, Associate professor, Department of Microbiology, TMCH. She explained in detail about Application of Antimicrobial stewardship in HIC A Break of 10mins is given to the students. The third session started around 1pm and continued till 5.00pm.

All students were divided into batches for Video demonstration and training given on Biomedical waste disposal, Management of needle stick injury, Steps of Hand hygiene and Proper disinfection of spill by Dr.I.Kannan Msc, PhD (Asst Prof, Microbiology) Mrs. Sony paul Msc (Asst. Prof., Microbiology) Dr.R.Dinesh Raj M.D (Asst. Prof., Microbiology), Dr.P.Savetha M.D (Asst. Prof., Microbiology) and Dr. K.Kayalvili M.D(Asst. Prof., Microbiology), which students found very interesting and informative. Subsequently, Post test was conducted with the same questionnaire as pre-test to evaluate the knowledge gained by the participants after the session.

By comparing the data of pre-test and post test data it is evident that students scored better in post-test. Session ended with certificate distribution to all the participants.

And vote of thanks by, Dr. E.Premalatha, Asst. Professor, Department of Microbiology, TMCH.

Objective of the Program	To provide in depth knowledge and practical experience on suturing and knotting techniques
--------------------------	--

Detailed report of the program

The workshop started with registration at around 8.45 am. The program begun at 9.00 am. The program commenced with Tamil Thai Vaazhthu, followed by welcome note given by Prof. Dr. D.R. Loganathan, Department of General surgery by welcoming Prof Dr. Kumudha Lingaraj, Dean, Prof Dr. Karunanithi Medical superintendent. Prof Dr.Kumudha Lingaraj, Dean and Prof Dr Karunanithi Medical Superintendent, addressed the gathering and shed spot light on the importance of suturing and knotting in their career and the significance in organizing this workshop.

Later, the participants were asked to fill the pre-test questionnaire. The first session started at around 10.00 am. Dr. D.R. Sandeep.U, consultant plastics and reconstructive surgeon at CSSH explained in detail about suturing and various techniques via google meet. The second session was taken by Dr. Swathika, surgical registrar at Apollo hospitals on various knotting techniques followed by hands on training in suturing and knotting for participants.

She was felicitated by Prof Dr. K.Jawahar, Head of the department, General surgery. Then the participants had high tea with snacks for around 10 minutes. The workshop continued for around next 2 hours with exclusive hands on training for the participants under the guidance of the faculties. After the session, Post-test was conducted. Then the participants were asked to fill the feedback form regarding the Workshop. Few of them volunteered to give their comments on the Workshop.

All the Participants who attended the Workshop on suturing and knotting were issued certificates by the Guest speaker, Dean, Medical Superintendent and Head of the departments. Finally vote of thanks was given by Dr.Preethiya senior resident, department of general surgery

Feedback analysis of the participants:

The feedback was purely anonymous.

The percentage of participants rated good for clarity was 83%, informative (86%), interactive (76%), increased analyzing capacity (79%), addressed queries (83%) and time management (86%). All 100% participants found the workshop to be satisfactory. The Strengths of the workshop mentioned were well organised, the interactive sessions, the speakers, time management, hands-on training .The limitations were - short duration of the workshop.

The overall suggestions from the participants were to provide more frequent workshops, more time for group activities, to provide suturing kits for individual candidates.

Detailed report of the program

The Program was started around 8.45am with registration and assembling of Final year MBBS students and CRRI's in Lecture Hall -1.

At 9 am, Program was commenced by our Dean Dr.N.Gunasekaran, who addressed the students and guests, emphasized the importance of Basic Life support to the participants.

Later, all students were asked to attend a Pre-test on BLS to assess their existing knowledge about the topic. They were given a duration of 20 minutes to complete the test.

After the Pre-test, first session started around 10 am. DR.S.S.C. Chakra Rao, Guest speaker, chairman of Indian resuscitation council explained the importance of BLS in day-to-day life with real data and figures, He nicely elaborated on the various scenarios of cardiac arrest with informative animations and videos of real-life incidents, which was thoroughly enjoyed and appreciated by the students and faculties.

The Second session started with Brief introduction and demonstration of installation of the app named "Q CPR CLASSROOM"- by the Laerdal anniewhere coordinator Ms.Uzma Syed. Furthermore, she also explained in detail about the usage of App for hands on BLS training.

A Break of 10mins is given to the students for app downloading and installation. Light snacks were provided to all the students.

In the third session, all students were given hands on training on BLS using their respective mobiles over the tables. App recorded the quality of CPR provided by the students and live feedback were provided to all students by in-house faculties and also virtually by coordinator Dr.S.Sivakumar., MD., which helped the students to correct their mistakes instantly. Finally a detailed report regarding their quality of CPR is generated in the mobile app itself which students found very interesting and informative. Subsequently one more session of hands-on training was conducted in person using CPR mannequins.

Faculties Dr.M.Nazir Ahmed Dr.R.Shankar Anand., MBBS. DNB. Revised the topic and students enthusiastically performed CPR on the mannequins and the faculties guided them for providing quality CPR.

Pre-test & Posttest Evaluation:

Bar chart depicting the comparison of the marks scored by participants in pre-test and post-test questionnaire.

Subsequently, Post test was conducted with the same questionnaire as pre-test to evaluate the knowledge gained by the participants after the session. By comparing the data of pre-test and post test data it is evident that students scored better in post-test. Session ended with certificate distribution to all the participants. And vote of thanks by Dr.S.Bharath.,M.D.,

Feedback from Participants

- Anonymous feedback was obtained from all the participants
- Overall, Students felt that lecture given by speaker was excellent. And they rated the session and speaker an average score of 9 / 10
- Participants were quite impressed with the hands-on training which is evident from the rating of 8.5/10

Detailed report of the program

The Program was started around 8.45am with registration and assembling of Final year MBBS students and CRRI's in Lecture Hall -1.

At 9 am, Program was commenced by our Dean Dr.Gunasekharan, who addressed the students and guests, emphasized the importance of Basic Life support to the participants.

Later, all students were asked to attend a Pre-test on BLS to assess their existing knowledge about the topic. They were given a duration of 20 minutes to complete the test.

After the Pre-test, first session started around 10 am. DR.S.S.C. Chakra Rao, Guest speaker, chairman of Indian resuscitation council explained the importance of BLS in day-to-day life with real data and figures, He nicely elaborated on the various scenarios of cardiac arrest with informative animations and videos of real-life incidents, which was thoroughly enjoyed and appreciated by the students and faculties.

The Second session started with Brief introduction and demonstration of installation of the app named "Q CPR CLASSROOM"- by the Laerdal anniewhere coordinator Ms.Uzma Syed. Furthermore, she also explained in detail about the usage of App for hands on BLS training.

A Break of 10mins is given to the students for app downloading and installation. Light snacks were provided to all the students.

In the third session, all students were given hands on training on BLS using their respective mobiles over the tables. App recorded the quality of CPR provided by the students and live feedback were provided to all students by in-house faculties and also virtually by coordinator Ms. Uzmasyed, which helped the students to correct their mistakes instantly. Finally a detailed report regarding their quality of

CPR is generated in the mobile app itself which students found very interesting and informative.

Subsequently one more session of hands-on training was conducted in person using CPR mannequins.

Faculties Dr.M.Nazir Ahmed and Dr.A.C.Malarvizhi., revised the topic and students enthusiastically performed CPR on the mannequins and the faculties guided them for providing quality CPR.
