### Objective of the Program

The objective of the present course is to give knowledge to the students about the Research Methodology  
The participants will be given training about how to write the research article, ethics and Basic Overview Formulating the Research Process and Research Problem. Citation methods and various other important key note about research methodology

### Detailed report of the program

The course was organized by the Department of Community medicine The course was organized for the students to get to give hands on training and basic knowledge about research methodology. The course was started with the inaugural program organized by the head of the department of Microbiology. Dean Dr. Gunasekaran and Medical Superintendent Dr. Thiru Narayanan addressed the gathering.

The First session on introduction and steps in medical research was highlighted the importance of research in undergraduate curriculum and explained the various steps involved in conducting biomedical research.

Followed by which the learning sessions by Resource Person Dr. I Kannan Associate Professor, Dept of Microbiology TMCH gave a wide range training for the students regarding Research methodology Course completion certificate was given to all the participants and feedback was also obtained from the students.

The various modes of literature search were explained in details. This was followed by the session on research study designs discussed and the types of quantitative and qualitative study designs with appropriate example.

The methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session, the application of statistics in medical search was discussed highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis.

Objective of the Program	The primary objective of this program is to provide healthcare professionals with essential knowledge about the basics of computers, equipping them with valuable skills for their future presentations, research activities, and data reviewing.
--------------------------	---

### Detailed report of the program

The Medical Education Unit organized a comprehensive course aimed at familiarizing students with computer basics and the fundamentals of Windows 10. The course also covered practical training in creating, sharing, and collaborating on documents using various MS Office applications, Google Drive, and Windows Defender. The program was designed to equip students with essential computer skills, enhancing their proficiency in handling seminar presentations, research projects, and other academic tasks.

#### Course Details:

- **Organizer:** Medical Education Unit
- **Purpose:** To familiarize students with computer basics and MS Office applications for document creation and collaboration.
- **Topics Covered:** Computer basics, Windows 10, Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, MS PowerPoint 2016, voice narration, rotating objects, creating professional presentations, and using hyperlinks.
- **Total Beneficiaries:** A total of 154 out of 158 students were benefited from the course.
- **Course Duration:** The course was conducted on four Saturdays from 9:00 am to 1:00 pm.
- **Venue:** The course took place in the lecture hall
- **Resource Person:** Mr. Anil Jenifer, B.Tech, served as the resource person for the course, providing expert guidance and practical training.

  
DEAN

## **TAGORE MEDICAL COLLEGE & HOSPITAL**

(Approved by M.C.I. and Govt. of India and affiliated to the Tamil Nadu Dr. MGR Medical University)

Rathinamangalam, Melakkottaiyur Post, Chennai - 600 127.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

**Course Content:** The course commenced with an introduction to computer basics and an overview of Windows 10, ensuring that students were well-versed with the fundamental aspects of computing. Subsequently, hands-on workshops were conducted on Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, and MS PowerPoint 2016, enabling participants to gain practical experience in using these essential software tools. Moreover, students learned how to create voice narrations, rotate objects, and develop professional presentations with the inclusion of hyperlinks.

**Outcome:** Upon successful completion of the course, participants received course completion certificates, acknowledging their acquired computer skills. Feedback was collected from the students, and the overall response was positive, indicating the effectiveness of the training.

**Benefits for Students:** The course provided significant benefits to the students, including:

1. **Enhanced Computer Proficiency:** Participants gained confidence and proficiency in using computers and various MS Office applications.
2. **Improved Productivity:** Knowledge of efficient document creation and collaboration techniques allowed students to optimize their academic work.
3. **Better Presentations:** Students acquired skills to create professional and engaging presentations, adding value to their seminar and research projects.
4. **Academic Advantages:** The acquired computer skills positioned the students to excel in various academic tasks, contributing to their overall performance.

**Conclusion:** The Computer Basics and MS Office course organized by the Medical Education Unit proved to be highly beneficial for the students. Equipped with essential computer skills and practical knowledge, the participants were well-prepared to handle seminar presentations, research projects, and other academic activities more effectively. The course's success highlights the significance of incorporating computer education in the academic curriculum, empowering students to thrive in the digital age.

			Preparation of ligand – Drug designing software- ACD Che sketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.		

### Report of the program

The course was organized by the Department of Microbiology. The course was organized for the students to get to give hands on training in application of various online tools and software in drug development for diseases.

The course was started with the inaugural program organized by the head of the department of Microbiology. Dean Dr. Gunasekaran addressed the gathering. Followed by which the learning sessions were started.

The event aimed to provide a platform for the field of molecular docking. The event aimed to provide a platform for knowledge exchange networking and discussions on the latest advancements, challenges and future prospects in the field.

A brief introduction about Molecular Docking which is computational technique was given by the speaker Dr. I Kannan. He shared his expertise and insight on molecular docking. AN extensive review of basic principles, methodologies and applications of molecular docking in various field of research and its importance in drug discovery was explained in detail during the course.

Recap of the importance of molecular docking in various research areas. Discussions and workshops encouraged active student participation and led to fruitful exchanges of ideas. Parallel workshops were also conducted during the event allowing attendees to gain hands-on experience with popular molecular docking software and tools. Summary of challenges and future directions for the field.

### PROGRAMME REPORT

Name/Title of the program	Computer skills and its application in Health Care		
Date and Time	04.12.2018, 05.12.2018, 06.12.2018	9.00 am to 4.00 pm	
Venue	Lecture hall - II Tagore medical college & hospital		
Target audience/Stakeholder	II year MBBS students		
Number of Participants	163 students		
Program/Event Organized by	Medical education Unit & Information technology Department		
Resource Persons Name and Topic Taken	Name	Designation	Topic Taken
	Mr. Anil Jenifer B.Tech	System Admin	Basic of windows 10 How to create, share and collaborate documents using Google drive, MS Word 2016 windows defender, Ms Excel 2016, Ms Word 2016, Ms Power point 2016 create voice narration, Rotating object, animated slides using images and graphics, professional presentation, Hyperlinks hand on workshop
Objective of the Program	The primary objective of this program is to provide healthcare professionals with essential knowledge about the basics of computers, equipping them with valuable skills for their future presentations, research activities, and data reviewing. <b>Outcomes:</b> Upon completion of the program, healthcare professionals can expect the following outcomes:		

  
 DEAN  
 TAGORE MEDICAL COLLEGE & HOSPITAL  
 RATHINAMANGALAM, MELAKKOTTAIYUR POST,  
 CHENNAI-600 127.

## TAGORE MEDICAL COLLEGE & HOSPITAL

(Approved by M.C.I. and Govt. of India and affiliated to the Tamil Nadu Dr. MGR Medical University)  
Rathinamangalam, Melakkottaiyur Post, Chennai - 600 127.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

**Enhanced Computer Proficiency:** Participants will gain a strong foundation in computer basics, enabling them to navigate digital tools and technologies with ease.

**Confident Presentations:** Healthcare professionals will have the skills to create and deliver engaging and professional presentations, effectively conveying their research findings and medical knowledge.

**Improved Research Abilities:** Participants will be better equipped to conduct research activities, analyse data, and review medical literature, contributing to evidence-based healthcare practices.

**Efficient Data Management:** Healthcare professionals will possess the knowledge and skills to handle patient data and research data responsibly and securely.

**Streamlined Collaboration:** Understanding digital collaboration tools will enable participants to work efficiently with colleagues and research teams, improving overall productivity.

### Detailed report of the program

The Medical Education Unit organized a comprehensive course to familiarize students with computer basics and the fundamentals of Windows 10. The course also covered essential skills in creating, sharing, and collaborating on documents using various software tools, including Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, and MS PowerPoint 2016. Additionally, students learned how to incorporate voice narration, rotating objects, creating professional presentations, using hyperlinks, and participated in hands-on workshops.

#### Course Details:

- Organizer: Medical Education Unit
- Purpose: To familiarize students with computer basics and various software tools for document creation and collaboration.

DEAN  
TAGORE MEDICAL COLLEGE & HOSPITAL  
RATHINAMANGALAM, MELAKKOTTAIYUR POST,  
CHENNAI-600 127.

## TAGORE MEDICAL COLLEGE & HOSPITAL

(Approved by M.C.I. and Govt. of India and affiliated to the Tamil Nadu Dr. MGR Medical University)

Rathinamangalam, Melakkottaiyur Post, Chennai - 600 127.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

- **Topics Covered:** Computer basics, Windows 10, Google Drive, MS Word 2016, Windows Defender, MS Excel 2016, MS PowerPoint 2016, voice narration, rotating objects, creating professional presentations, and using hyperlinks.

### Participants and Beneficiaries:

A total of 163 students registered for the course, and 160 students benefited from the training. The course received positive feedback and appreciation from the participants.

### Course Completion and Feedback:

All participants received course completion certificates upon successfully completing the training. Feedback was actively sought from the students to evaluate the effectiveness of the course and identify areas for improvement.

### Benefits for Students:

The course proved to be highly beneficial for the students in various aspects:

1. **Enhanced Computer Skills:** Participants gained proficiency in using computers and various software tools, empowering them to navigate the digital world confidently.
2. **Document Collaboration:** Learning how to create, share, and collaborate on documents using tools like Google Drive and MS Word 2016 prepared students for effective teamwork and seamless document management.
3. **Presentation Skills:** The course equipped students with the knowledge and skills to create professional presentations, including voice narration and rotating objects, enhancing their ability to deliver impactful seminars and projects.
4. **Research Project Support:** The acquired computer and software skills are invaluable for conducting research projects efficiently and producing high-quality outputs.

The course organized by the Medical Education Unit effectively empowered students with computer and software proficiency. The knowledge gained in document creation, collaboration, and presentation skills will serve the participants well in their academic pursuits, seminar presentations, and research projects. The initiative of providing hands-on training and engaging with various software tools ensured that the students can apply these skills effectively in their academic and professional lives.

			Retrieval of drug and chemical structures from pubchem and ZINC database Preparation of ligand - Drug designing software- ACD chemsketch - Preparation of lead molecules - OPENBABEL Software Demonstration
Objective of the Program	The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.		

### Report of the program

The Department of Microbiology organized a hands-on training course on the application of various online tools and software in drug development for diseases. The course aimed to equip students with practical knowledge and skills to utilize digital resources effectively in the field of drug development. The program was led by Dr. I Kannan, Associate Professor in the Department of Microbiology.

The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.

The training program covered the following key aspects:

1. Introduction to Drug Development: An overview of the drug development process, including identification, design, and testing of potential drugs.
2. Online Tools and Software: Demonstrations and practical sessions on using various online tools and software specifically tailored for drug development purposes.
3. Real-world Examples: The participants were provided with relevant examples and case studies to better understand the practical application of the demonstrated techniques.

Ph. : 044 - 3010 1111, Fax No. : 044 - 3010 1100 E-mail : tagoremch@gmail.com

4. **Hands-on Practice:** The participants actively engaged in hands-on practice during the course, gaining valuable experience in using digital resources.

Dr. I Kannan, an esteemed Associate Professor in the Department of Microbiology, served as the resource person for the course. His expertise in the field and passion for teaching ensured that the participants received valuable insights and guidance.

The hands-on training course on online tools and software in drug development for diseases organized by the Department of Microbiology proved to be highly beneficial for the participating students. By gaining practical experience in utilizing digital resources, the participants enhanced their skills and knowledge in drug development, contributing to their overall academic and professional growth. The success of the program indicates the importance of incorporating such practical training initiatives to equip students with relevant and applicable skills in their chosen fields of study.

			designing software- ACD chemsketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The primary objective of the present course is to provide participants with hands-on training in the application of various online tools and software in the field of drug development for diseases. The course is designed to equip attendees with practical knowledge and skills, enabling them to effectively use digital resources for drug discovery and development.		

### Detailed report of the program

The Department of Microbiology organized a hands-on training course on the application of various online tools and software in drug development for diseases. The course aimed to equip students with practical knowledge and skills to utilize digital resources effectively in the field of drug development. The program was led by Dr. I Kannan, Associate Professor in the Department of Microbiology.

**Objective:** The primary objective of the course was to provide students with hands-on training in using online tools and software for drug development. By the end of the course, participants were expected to gain proficiency in applying various techniques and resources to develop drugs for different diseases.

#### Batch Details:

- Regular Batch (2018-2019): 146 students registered
- Supplementary Batch: 13 students registered

**Total Participants:** The course successfully benefited a total of 1159 students from both the regular and supplementary batches.

**Course Content:** The training program covered the following key aspects:

1. Introduction to Drug Development: An overview of the drug development process, including identification, design, and testing of potential drugs.
2. Online Tools and Software: Demonstrations and practical sessions on using various online tools and software specifically tailored for drug development purposes.
3. Real-world Examples: The participants were provided with relevant examples and case studies

to better understand the practical application of the demonstrated techniques.

4. **Hands-on Practice:** The participants actively engaged in hands-on practice during the course, gaining valuable experience in using digital resources.

**Resource Person:** Dr. I Kannan, an esteemed Associate Professor in the Department of Microbiology, served as the resource person for the course. His expertise in the field and passion for teaching ensured that the participants received valuable insights and guidance.

**Course Completion and Feedback:** Upon successful completion of the training, all participants were awarded course completion certificates. Feedback from the students was actively sought to assess the effectiveness of the program and identify areas for improvement in future editions.

**Conclusion:** The hands-on training course on online tools and software in drug development for diseases organized by the Department of Microbiology proved to be highly beneficial for the participating students. By gaining practical experience in utilizing digital resources, the participants enhanced their skills and knowledge in drug development, contributing to their overall academic and professional growth. The success of the program indicates the importance of incorporating such practical training initiatives to equip students with relevant and applicable skills in their chosen fields of study.

<b>Objective of the Program</b>	Primary objective of the present course is to provide students with comprehensive knowledge and training in research methodology. The course aims to equip participants with essential skills and understanding necessary for conducting high-quality research and writing research articles effectively. It will cover various aspects of research, including ethics, formulating research processes, research problems, citation methods, and other key components of research methodology
---------------------------------	--

### **Detailed report of the program**

The course was organized by the Department of Community medicine The course was organized for the students to get to give hands on training and basic knowledge about research methodology.

The course was started with the inaugural program organized by the head of the department of Microbiology. Dean Dr. Gunasekaran and Medical Superintendent Dr. Thiru Narayanan addressed the gathering.

The First session on introduction and steps in medical research was highlighted the importance of research in undergraduate curriculum and explained the various steps involved in conducting biomedical research.

Followed by which the learning sessions by Resource Person Dr. I Kannan Associate Professor, Dept of Microbiology TMCH gave a wide range training for the students regarding Research methodology Course completion certificate was given to all the participants and feedback was also obtained from the students.

The various modes of literature search was explained in details. This was followed by the session on research study designs discussed and the types of quantitative and qualitative study designs with appropriate example.

The methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session, the application of statistics in medical

search was discussed highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis.

A Group activity in which the participants were divided into groups and were asked to prepare a thesis proposal. This was facilitated by the resource persons and the participants were asked to present the proposals developed by them and necessary corrections were done by the resource persons. All the sessions were followed by group activity where the participants were actively involved in problem Solving.

## Detailed Report of The Program

The event began at 9am Dr.Balaji ,Prof and HOD,Department of Community Medicine, TMCHgave the welcome address and formally introduced the resource persons to the participants. After the self-introduction of the participants, pre-test was conducted. After pre-test the first session on introduction and steps in medical research was taken by Dr.Balaji, highlighted the importance of research in post graduate curriculum and explained the various steps involved in conducting biomedical research. The various modes of literature search were explained in details. This was followed by the session on research study designs by Dr.C.Sivagurunathan, Associate Professor,Community Medicine. He discussed the types of quantitative and qualitative study designs with appropriate example.Following tea break, Dr.N.Gunasekaran, DEANTagore Medical College and Hospital addressed the participants. He emphasized on the need for conducting research and the importance of learning updatingourselves with latest guidelines and treatment protocols. This was followed by session on sample methods and sample size calculation by Dr.Balaji, Professor and Dr.M.Ezhilvanan,statiscian,they discussed the various methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session,the application of statistics in medical search was discussed by Dr.A. Balaji and Dr.M.Ezhilvanan.they highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis. The post lunch was a group activity in which the participants were divided into four groups and were asked to prepare a thesis proposal and this was facilitated by the resource persons and the participants were asked to present the proposals developed by them and necessary corrections were done by the resource persons. All the sessions were followed by group activity where the participants were actively involved in problem solving. The vote of thanks was delivered by Dr.c.sivagurunathan

## Detailed Report of The Program

Respected Dr.Karunanithi Ramaiah, Medical Superintendent, TMCH presided the Virtual inauguration and gave opening remarks for the second session in Research Methodology Training Series. Dr.I.Kannan, Officer Incharge, CRL addressed the participants and reiterated the importance of Training in Research Study Designs while undertaking Research. A Pre Session Assessment link as posted in the Chat Box and participants were asked to submit before the Session. Dr.Abhijit Boratne, Speaker of the Program joined the Virtual inauguration and this was moderated by Dr.Sree T. Sucharitha, Research Coordinator, CRL

The First Scientific Session Titled: Introduction to Research Study Designs was delivered by Dr.Abhijit Boratne, Prof and HOD Community Medicine, MGMCRI, Puducherry and introduced the various Research Study Designs with special focus on Advantages and Disadvantages of the Study Designs and Epidemiological Studies undertaken by this Researcher during Covid -19 Pandemic.

The Next Session was taken by Dr.Kalaivani which discussed in-depth about Cross Sectional Study Designs, highlighting the various steps and steps involved in conducting these studies including validation of Study Instruments and Strobe Checklist.

The Next Session was taken by Dr.Jayashree was interactive which discussed Cohort Study Designs and Natural History of Disease, Types of Cohort Study Designs with review of studies undertaken.

Qualitative Research Methods were discussed. Historical Perspectives, Approaches, Research Instruments, Emerging Trends and Pitfalls were presented. Award Winning Papers along with Experiences in conducting such Studies were shared by Dr.Sree T. Sucharitha.

Dr.Rizwan took session on Case Control Studies with involvement of Participants in Lively Interaction discussing OR, Matching And Regression Analysis. Current Studies about Mucormycosis and Covid and Adolescent Pregnancies in NIE-ICMR were Shared. After summary and Take Home Learning, Re-Cap session by Dr.Vinodh Raja, PG-Community Medicine, Post-Test Assessment was administered. Dr.Rajeswari proposed Vote of Thanks and Training Program was successfully conducted.

### Use of Biological resources for Patents

- ▶ Any person, who intends to apply for a patent or any other form of intellectual property protection whether in India or outside India relating to any biological resources and/ or associated traditional knowledge occurring in or obtained from India is required to apply to obtain approval from National Biodiversity Authority (established by the Government of India under the powers granted to it by Section 8 of the Biological Diversity Act 2002).
- ▶ The applicant must include geographical origin of the biological resources in the patent specification
- ▶ It is mandatory for the applicant of a patent to submit a declaration under Form-1 (Application for Grant of Patent) of the Patent Rules 2003 to the effect that "the invention as disclosed in the specification uses the biological material from India and the necessary permission from the Competent Authority shall be submitted by me/us before the grant of patent to me/us."

### Patent Process in India

Filing	<ul style="list-style-type: none"><li>• Patentability Analysis by Searching for novelty-optional.</li><li>• Drafting of patent specification-provisional or complete specification.</li><li>• Filing application at the patent office: For provisional applications, the complete specification must be filed within 12 months.</li></ul>
Publication	<ul style="list-style-type: none"><li>• Application is published automatically by the patent office after 18 months from filing/priority date whichever is earlier.</li><li>• Request for early publication can be filed to accelerate the grant process.</li></ul>
Examination	<ul style="list-style-type: none"><li>• Request for examination must be filed within 48 months from the date of filing/priority date whichever is earlier.</li><li>• The application is taken up for examination by the patent office only after publication. Expedited examination request can now be filed in India.</li></ul>

## Photos

Points to be considered - designing questionnaire

- ▶ Questionnaire will act as data dictionary
- ▶ Numbering for both questions and options
- ▶ Questionnaire flow
- ▶ Split the questions by sections
- ▶ Key can be single or multiple (Data from multiple centres)
- ▶ Clear instructions to fill the forms for all questions
- ▶ Adequate space to write the responses

			lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The objective of the present course is to give hands on training in application of various online tools and software's in drug development for diseases. The participants will be given with examples after the demonstration of various techniques to understand and apply them in drug development		

## Detailed report of the program

The computer Aided Drug Designing course, held on 4<sup>th</sup>, 5<sup>th</sup> & 6<sup>th</sup> August 2022, was an informative course organized and conducted by the Department of Microbiology. The event aimed to provide a platform for the field of molecular docking. The event aimed to provide a platform for knowledge exchange networking and discussions on the latest advancements, challenges and future prospects in the field

A brief introduction about Molecular Docking which is computational technique was given by the speaker Dr. I Kannan. He shared his expertise and insight on molecular docking. AN extensive review of basic principles, methodologies and applications of molecular docking in various field of research and its importance in drug discovery was explained in detail during the course.

Recap of the importance of molecular docking in various research areas. Discussions and workshops encouraged active student participation and led to fruitful exchanges of ideas. Parallel workshops were also conducted during the event allowing attendees to gain hands-on experience with popular molecular docking software and tools. Summary of challenges and future directions for the field.

Participants had opportunity to learn practical aspects of docking simulations, scoring functions and results analysis, enhancing their understanding of the subject matter.

In 2020-2021 batch a total of 142 and Supplementary batch 28 students registered for the course. Total 170 students were benefited with the course.

			Aware of drugs Look alike & sound alike Emergency & high-risk drugs
Objective of the Program	Overall, the objective of the NABH course is to impart knowledge, skills, and awareness that enable participants to play an instrumental role in promoting quality healthcare services, patient safety, and accreditation readiness in hospitals. By equipping students with these competencies, the course contributes to the improvement of healthcare standards and ensures better patient care experiences.		

## About the program

The course was organized by IQAC in association with Medical Education Unit. The course was organized for the students to get trained about NABH. The course started with the welcome speech by the IQAC Coordinator. He introduced the speakers Head of the department Dr.Luck C P who is one of the speaker. He gave a brief note about the importance of NABH & introduced the speaker.

The certificate course on NABH (National Accreditation Board for Hospitals & Healthcare Providers) for Hospital was conducted successfully and received positive feedback from the VI year & PG students. NABH accreditation is a prestigious recognition that signifies the hospital's commitment to providing high-quality healthcare services.

The course appears to have covered all aspects of hospital information systems and their significance in the healthcare sector. This comprehensive coverage would have provided students with a well-rounded understanding of the role and importance of information systems in managing hospital operations, patient records, and overall healthcare delivery.

The positive feedback from the students indicates that they found the course to be highly beneficial. This suggests that the course content was engaging, relevant, and applicable to their future careers in the healthcare industry.

The mention of the course being well-organized reflects the efforts put into planning and structuring the curriculum. A well-organized course helps students grasp concepts more effectively and enhances their overall learning experience.

The students' praise for the instructors' expertise is crucial as it highlights the importance of having knowledgeable and experienced educators leading the course. Instructors with expertise in the subject matter can provide valuable insights and real-world examples, making the learning process more insightful.

The hands-on experience with the software is a significant aspect of any course related to hospital information systems. This practical exposure allows students to apply theoretical concepts in real-world scenarios, enabling them to build practical skills and confidence.

It's encouraging to know that the feedback provided by the students was discussed and actions were taken accordingly. This demonstrates a commitment to continuous improvement and responsiveness to the students' needs and suggestions.

Overall, the positive response from the students and the successful organization of the NABH course suggests that it effectively met its objectives of familiarizing students with hospital information systems and their role in ensuring quality healthcare services. By providing students with comprehensive knowledge and practical experience, the course has likely equipped them to contribute effectively to the healthcare sector and pursue careers in hospital management and administration.

graduate curriculum and explained the various steps involved in conducting biomedical research.

The various modes of literature search were explained in details. This was followed by the session on research study designs. He discussed the types of quantitative and qualitative study designs with appropriate example.

Dean Tagore medical college and hospital addressed the participants on day 2. He emphasized on the need for conducting research and the importance of learning updating ourselves with latest guidelines and treatment protocols. This was followed by session on sample methods and sample size calculation by, Dept of Community medicine. He discussed the various methods of probability and non-probability sampling and explained the sample size estimation techniques for different study designs. Following this session, the application of statistics in medical search was discussed. They highlighted the importance of choosing the appropriate statistical test for the purpose of data analysis.

A Group activity was conducted after teaching sessions in which the participants were divided into four groups and were asked to prepare a thesis proposal. This was facilitated by the resource persons and the participants were asked to present the proposals developed by them and necessary corrections were done by the resource persons. All the sessions were followed by group activity where the participants were actively involved in problem Solving.

			chemical structures from pubchem and ZINC database Preparation of ligand – Drug designing software- ACD chemsketch – Preparation of lead molecules – OPENBABEL Software Demonstration
Objective of the Program	The objective of the present course is to give hands on training in application of various online tools and software in drug development for diseases.  The participants will be given with examples after the demonstration of various techniques to understand and apply them in drug development		

## Report of the program

The course was organized by the Medical Education Unit. The course was organized for the Postgraduates to get to give hands on training in application of various online tools and software's in drug development for diseases.

The program started with the addressing the students by the MEU Coordinator Dr. DH. Gopalan. HE Introduced the speakers and later on the course was started.

The first speaker Dr. Venkataraman gave a brief note about Molecular docking which is a powerful computational technique used in drug discovery and design. It plays a crucial role in understanding the interactions between ligands (small molecules or potential drugs) and target proteins (usually enzymes or receptors) at the molecular level.

The second speaker spoke about Principles of Molecular Docking which include Ligand Preparation. Protein Preparation, Docking Algorithm.

The third speaker covered about Applications of Molecular Docking like Lead Optimization,

**Virtual Screening, Prediction of Binding Modes, Identification of Off-Target Effects, Fragment-Based Drug Design, De Novo Drug Design: Challenges in Molecular Docking, Scoring Function Accuracy**

**Conclusion:** Molecular docking is an indispensable computational tool in modern drug discovery and design. Its ability to predict ligand-receptor interactions provides valuable insights into the molecular basis of drug-target interactions. By assisting in lead optimization, virtual screening, and de novo drug design, molecular docking accelerates the drug development process, making it an essential component in the quest for new therapeutic agents.

As computing power and algorithms continue to advance, molecular docking will play an increasingly critical role in the identification and optimization of drug candidates, ultimately leading to improved treatments and better healthcare outcomes. However, researchers must be mindful of the limitations and challenges associated with docking techniques and adopt appropriate validation methods to ensure the reliability of their results.

Course completion certificate was given to all the participants and feedback was also obtained from the students.
