

The Department of Anatomy, Tagore Medical College & Hospital organized a guest lecture on **“When Veins Fail: Clinical Anatomy of Lower Limb Venous Drainage”** for first-year MBBS students, delivered by Dr. Rajprasath, Assistant Professor, Department of Anatomy, All India Institute of Medical sciences (AIIMS), Madurai with the objective of enhancing students’ understanding of the superficial and deep venous systems and their clinical relevance; the speaker explained the course, tributaries, perforators, and venous valves using well-structured slides and clinical examples, highlighting important conditions such as varicose veins, deep vein thrombosis, and venous insufficiency, and the interactive session encouraged active student participation through questions and discussions, thereby strengthening conceptual clarity, clinical correlation, and examination preparedness, making the program educationally effective and well received by the students. We thank our Chairperson, Secretary, Dean and Medical Superintendent for making this event successful.
